Los Angeles, CA, June 2, 2026 -- **MOBI Technologies Inc.** (**MOBI** <https://mobiusa.com/>), a leading developer of connected home health devices, announced today the **new Smart Home Clinic for Father's Day**, an all-in-one smart wellness solution designed to help dads stay healthy, safe, and independent, giving family members greater peace of mind. The ultimate Father's Day gift, available now through Father's Day, June 21, 2026, the MOBI complete health bundle keeps dads connected to family and caregivers through one app for multiple devices for better health maintenance and to easily share the responsibility of caregiving between multiple family members to keep track of their health, even at a distance. The MOBI Smart Home Clinic is available at a special discount of 44% off for Father's Day at **only \$149 with free shipping (44% off - normally priced at \$269.96) with coupon code "DADCARE"** at <https://mobiusa.com/pages/fathers-day>.

The MOBI Smart Home Clinic includes:

- **Smart Bluetooth Blood Pressure Monitor:** The arm blood pressure monitor's cutting-edge technology tracks, saves, graphs, and shares blood pressure and pulse rate information with family and doctors. With its advanced Bluetooth connectivity, the monitor can be used independently or paired with a smartphone, giving dad the ability to sync readings and share them.
- **Smart WiFi Pill Dispenser:** reminds dad to take medications and detects when medications have been taken with up to 28 medication slots holding up to 35 tablets each. Additionally, it comes equipped with a **flashing LED light and audio alert** that reminds him when to take medicine, with an app for daily reminders that can be viewed locally and activated remotely to easily track progress, providing a history of when medications were taken or missed. The MOBI Smart Pill Dispenser also has a UV protection lid that protects light-sensitive medications and two safety **locks to prevent children or others from accessing meds**.

- **Smart Bluetooth Pulse Oximeter:** connects to the MOBI App to monitor trends and share readings with family and healthcare providers. It shows blood oxygen saturation, pulse rate, and pulse strength with results displayed in just 10 seconds with an OLED high-resolution color display for a clear visual graph.
- **Smart WiFi Scale:** tracks 18 body measurements to stay at a healthy weight, including weight, BMI, body fat rate %, muscle mass, fat mass, body fat index, obesity level, ideal weight, weight control, visceral fat index, weight without fat, body water %, bone mass, protein rate, BMR, metabolic age, body type, and body score.
- **MOBI Smart App:** allows dads and family members or healthcare providers to stay informed, maintain routines, and share important health data. Instead of using separate apps, devices, and disconnected systems, with the MOBI Smart App, everything works together in one simple ecosystem designed to share the responsibility between family members for convenience, confidence, and smarter everyday care.

“I founded MOBI based on my firsthand experience in the healthcare and pharmacy industries, where I saw many elderly individuals struggle to manage their health and often forget to take their medications,” said David Naghi, President & CEO, MOBI Technologies Inc. “That experience inspired me to develop MOBI’s cutting-edge technologies to bring accessible, easy-to-use connected healthcare solutions directly into the home.”

Pricing & Availability

Available immediately until June 21, 2026, the **MOBI Smart Home Clinic is priced at \$149** (normally priced at \$269.96) **with coupon Code “DADCARE”** and includes the Smart Blood Pressure Monitor, Smart Pill Dispenser, Smart Pulse Oximeter, Smart Scale, and MOBI Smart App. MOBI products are also available through major retail channels, including Amazon, Walmart, CVS, Walgreens, Target, Albertsons, Best Buy, and others.
