06112022

My step to reinstall in OBS

1}

I did an uninstall watching this video.

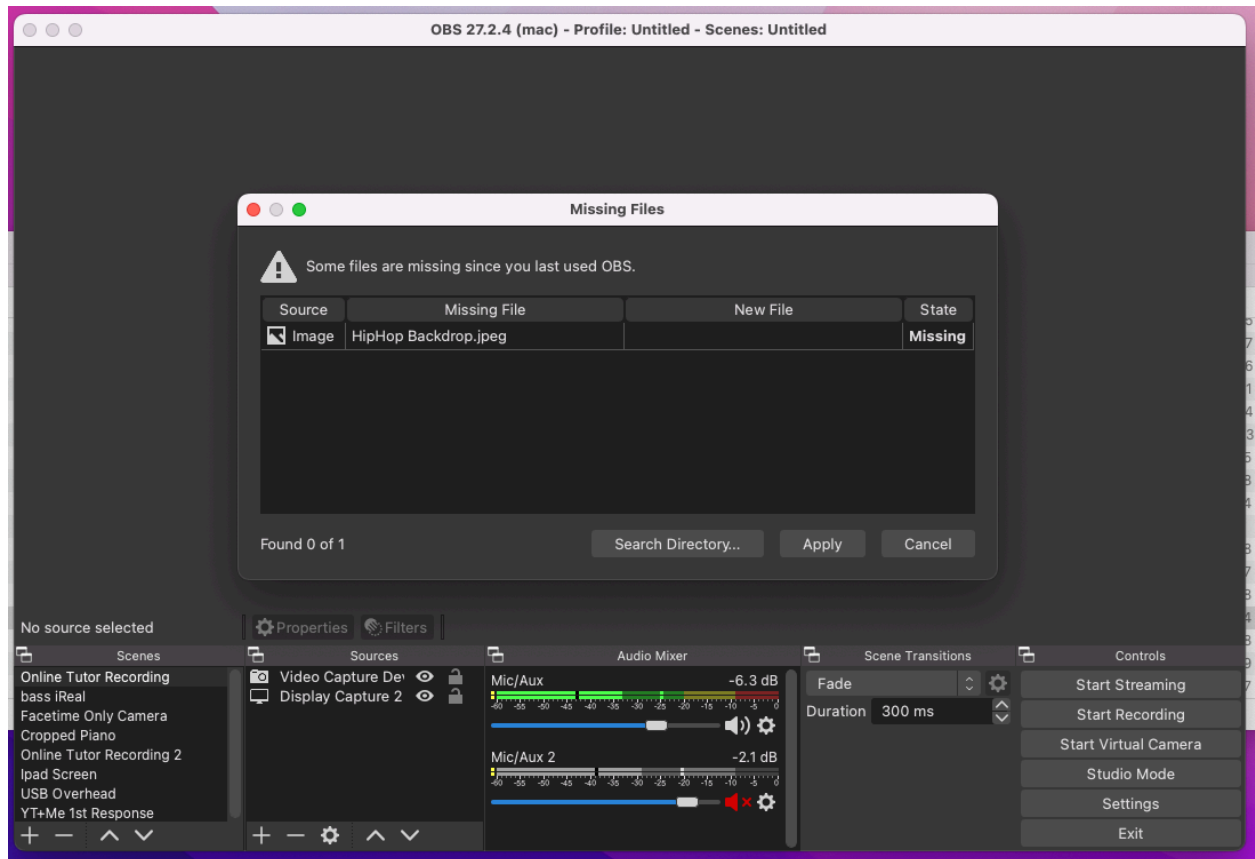

I watched this video which had me remove what he called the “leftovers”

https://youtu.be/k_GeaTfzgRU?t=87

2}

Then I reinstalled OBS

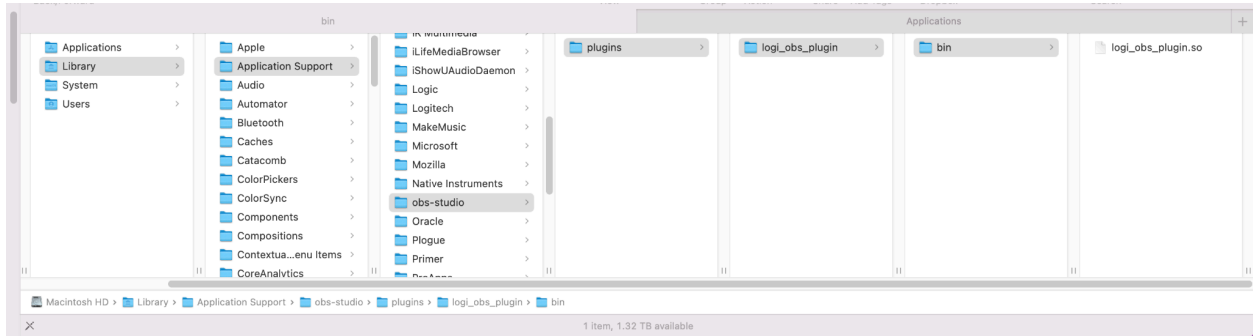

I get this message now

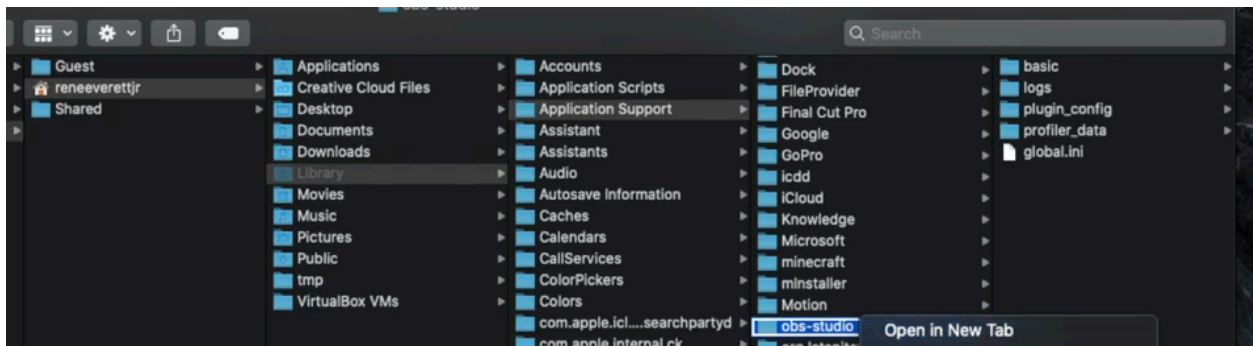

4} Researched or gathered in formation

I notice the folder in pathway Library Application Support → obs-studio → plugins is the only folder I have after reinstalling OBS. Where the YT Blazin' Tech has several folders (basic, logs, plug-in config, profiler_data and a "ini" file type).

05

Could this be causing my problem? What should I do at this point?
