Please copy the doc, fill out the answers and send it via slack to #stats

Request for TYPO3 Stats Data Collection

Question Title

your title here

Who and how to reach out

Show who (team/initiative) is requesting and who is “in charge” as the first point of contact and how to get in touch.

What data do you want to collect, and how/for what would you use it?

Describe the sort of data you want to collect and the purpose for collecting.

Why do you need to collect data/what is the question you want an answer to?

Ideally, you give a concrete description of your question. Find inspiration on the already published questions at talk.typo3.org.

What does the site owner get out of it?

As a community, we want to give the ones who install the extension benefits from the data collection. Please take a moment and consider why site owners should accept the data collection.

Have you already researched for data elsewhere, and where?

Other data collection services might already answer some questions. Please do some research online, e.g., at www.t3versions.com, and help us understand the importance of internal data collection.

Be aware that questions are published at talk.typo3.org for transparency.
