H Y P E R P I T U I T A R Y

5pg/mL estradiol levels

High DHT levels

DHT hyperactive around all growth zones

1 in a quadrillion height genetics

Be able to grow several inches a week

Regularly wake up a 1-2cms taller

Constant proportional expansion

Constant supply of glucosamine, vitamin C, MSM, and IGF-1 to all

33 spinal vertebrae

So much spinal cartilage produced that torso LENGTHENS

throughout day

Bones hyperresponsive to sprinting and LSJL by infinity

Healthy CO2 levels

Perfect oxygenation of all bones and tissues

3000% IGF-1 spikes when eating throughout the day

2000+ ng/mL levels of IGF-1 (reference range 182-780)

Pituitary gland only produces prolactin in the night

Minimal (virtually zero) prolactin levels in the day

– maximizes PURE androgenism like DHT for growth

Infinite potential to produce and release growth hormone

Energy amplified results from all height growth subliminals

Growthmaxxing results boosted and instantaneous

4000% GH spikes every 90 minutes

Pituitary gland has spiked GH by 4000% every 90m for years

Sensitive GH and IGF-1 receptors in all long bones

Abundant nitric oxide in all long bones

Hypertrophic zone of every bone activated to produce cartilage

Liver perfectly efficient at converting GH to IGF-1

Skeletal growth is permanent and irreversible

Extremely enlarged and hyperactive pituitary gland

Experience months worth of GH production in a night/day

Experience months worth of growth production in a night/day

Have acromegaly to the extent of Robert Wadlow and Adam Rainer

Pituitary gland releases 300 IU worth of GH every day (or more)

Remember pituitary gland releasing 300 IU of GH since YEARS ago

METHYLATION MANAGER

Extremely strong DNA

Constantly strengthened genetics

Abundance of and constant utilization of

- Riboflavin
- Niacin
- Folate
- Pyroxidine (vitamin B6)
- SAM-E
- MSM

Folate hypermethylates all growth plates in long bones for infinite growth potential

Folate increases skeletal muscle blood flow for symmetry and harmony in growth

Regulated SAM-E expression

DNA methylation perfectly and harmoniously managed every moment

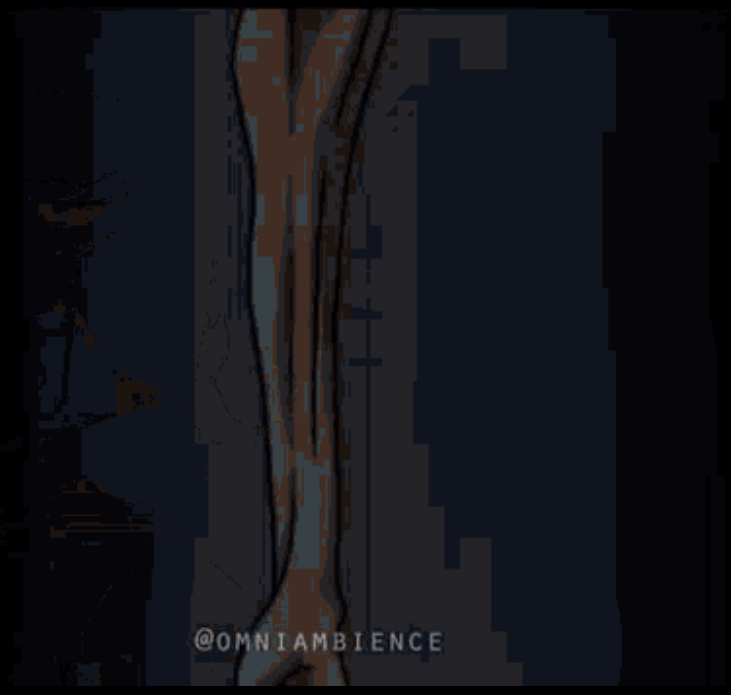

MSM allocated to all long bones

JAK2 and STAT5B expression increased in all long bones for stem cell proliferation and growth

Heightened levels of DNA methylation for all growth-inhibitory genes

Constant methylation and demethylation of appropriate genes every moment

H A N M A S T A C K

Always be hyper responsive to peptides and gene therapy

Genetic biokinesis booster

Virtual 50mcg Hexarelin injection every morning

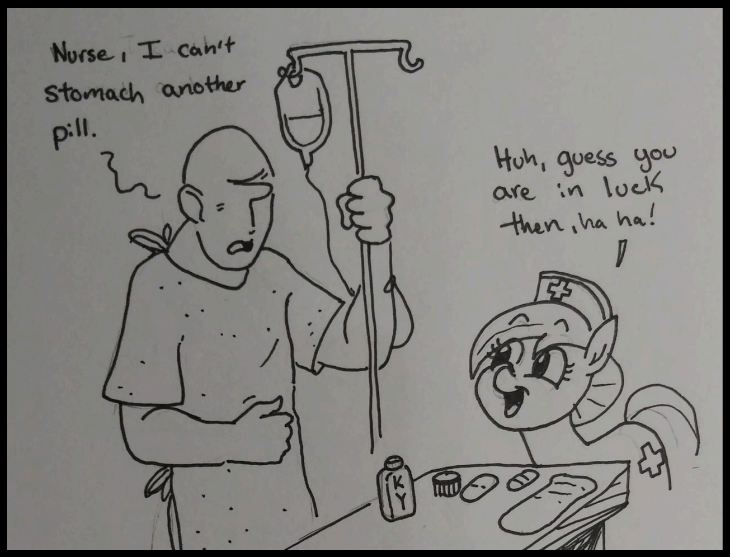

Memories of 50mcg Hexarelin injection every morning for years

Total PI3K pathway activation in all long bones

Total chondrocyte proliferation and bone elongation

Virtual 200mcg GHRP-2 injections thrice a day

Memories of 200mcg GHRP-2 injection thrice a day

5x HGH spikes several times throughout the day

Virtual 25mg CJC-1295 DAC injections every week

Memories of 25mg CJC-1295 DAC injection once a week for years

Baseline HGH levels permanently raised by over 10 fold

Baseline IGF-1 permanently raised by over 3 fold

MP31 micropeptide cycled for years to permanently inhibit GSK3b

- (this peptide also prevents Alzheimer's and enhances cognitive function btw)

Lithium allocated to all long bones

GSK3 beta and alpha expression individually deactivated in all bones and vertebrae

Unlimited epi/genetic growth potential for every single bone and vertebrae

GROWTH SPURT KICKSTARTER V4

Self-love boosted and activated

Total body comfort

Total comfort with growing

Effortlessly manifest however much growth you want

Mindset shifts to easily grow mms, 1cm, and cms at will

BMP-9 injections in all long bones instantly triggering growth

Decalcified pineal gland

Optimal melatonin production

Fixed circadian rhythm aligned with Sunrise and Sunset

Efficient and easy sleep

Dreams and subconscious visualizations of growing taller to your ideal

Extensive NLP to achieve the truest growth spurt mindset

Extremely high quality sleep, 50% deep 50% REM

Lowered somatostatin, higher baseline HGH that is diffused

equally across all long bones

Excess fat → Stem cells → Chondrocytes

ULTIMATE HYPOESTROGENIC GROWTH SPURT STACK MIMICKING:

- 50mg Clomid
- 25mg Aromasin

- 10mg Tamoxifen
- 5mg Letrozole

Deactivated estrogen receptors in all long bones

Complete desensitization to estradiol in all long bones

All long bones form microfractures extremely easily

Mimick injection of BMP-7 in all proliferation zones

Complete oxygenation of all growth plates

MORPHIC FIELD destroying all barriers between growth plate and bone
