

Privacy Policy for Rules Comparator Extension

****Last Updated:**** [02/07/2025]

Thank you for using Rules Comparator. This privacy policy outlines how our extension handles your data. Our core principle is to respect your privacy and collect only the minimum data necessary for the extension to function.

1. What Data We Handle

Our extension is designed to work entirely on your local machine. We do ****not**** collect, store, or transmit any Personally Identifiable Information (PII) such as your name, email address, or IP address.

The extension handles the following types of data:

- * ****User-Provided Rule List:**** The list of rule names that you manually type or paste into the extension's text area.
- * ****Webpage Rule List:**** The list of rule names that the extension reads from the

active Adobe Launch webpage (``experience.adobe.com``). This action is only performed when you explicitly click the "Fetch Rules from Page" button.

- * ****Active Tab URL:**** The URL of the current active tab.

- * ****Comparison Results:**** The results generated after comparing the two lists of rules.

2. How We Use Your Data

The data handled by the extension is used exclusively for the following purposes:

- * ****Core Functionality:**** To compare the user-provided rule list against the list fetched from the webpage and display the differences (matched, missing, or extra rules).

- * ****Session Persistence:**** To enhance your user experience, the rule lists, comparison results, and the associated URL are saved locally on your computer using the ``chrome.storage.local`` API. This allows you to close and reopen the extension popup without losing your work, as long as you are on the same webpage.

* ****Context-Aware Operation:**** We check the active tab's URL to enable the extension's icon only on `experience.adobe.com` domains and to ensure that your saved session is only restored on the correct page.

3. Data Storage and Security

****All data handled by this extension is stored exclusively on your local computer.****

We use the standard `chrome.storage.local` API provided by the browser. This data is ****never**** transmitted to, uploaded to, or stored on any external server, database, or third-party service. It remains within your browser's secure storage.

You can clear all stored data at any time by using the "Clear All" button within the extension or by clearing your browser's cache for extensions.

4. Data Sharing

We do not share any data with any third parties. Since all data remains on your local machine, there is no data to share.

5. Permissions Justification

Our extension requests the following permissions, and here is why we need them:

- * `tabs`: To read the URL of the active tab to enable/disable the extension and for our context-aware session persistence feature.
- * `storage`: To save your rule lists and comparison results locally on your device for a better user experience.
- * `scripting` & `host\_permissions` for `\*://experience.adobe.com/\*`: To inject a script that reads the rule names from the Adobe Launch page when you click the "Fetch Rules from Page" button. This is the core mechanism for the comparison feature.

6. Changes to This Privacy Policy

We may update this privacy policy from time to time. We will notify you of any changes

by posting the new privacy policy on this page and updating the "Last Updated" date.
