Notes:

At least 50% of the assigned sessions should be with a General Practitioner. A student can accompany General Practitioners on home visits and visits to residential homes.

It is appropriate for a Phase 3A student to have a maximum of one session working alongside reception staff.

It is appropriate for a Phase 3A student to have a maximum of two sessions working with a health care assistant.

It is appropriate for students to spend time with local charities if they provide services to people in need.

The private study day can vary according to your practice needs but the teaching day at the university is always Thursday.
