

How to DAO #3

"DAOS ALL THE WAY DOWN"

"IF TAXONOMY GOVERNS SOFTWARE DESIGN AND SOFTWARE GOVERNS REALITY, TAXONOMY CREATES REALITY"

Kei Kreutler, (Gnosis - Strategy Director) @ How to DAO #2

<TL;DR>: *LARGE SCALE PARTICIPATORY EVENT @ FULLNODE (TBC)*

- Hands on Workshop open to the public (3.5h)
- Taking the 1st steps to a Taxonomy of DAOs
- 30-40 participants producing content
- Strategic outreach to the community by Horatii Partners
- Methodology and Facilitation by Dupluswie and Greaterthan

How to DAO #2 brought about a high level discussion and its outcomes are actionable: How might we, as a community, create a Taxonomy and Typology of DAOs and their interaction possibilities? Now is time to take Collective Action!

#3 is the Magic Number

The first edition of **How to DAO** was magical - We got together In the beautiful space of Blockchain Embassy in Berlin and a very high percentage of pollinators and DAOStack team were present in the group of 60+ attendants.

Highlights to Bo and Shivani joining us for the first time. Matan Field showed how he cooks up a DAO from scratch, presentations by Olivier Sarrouy from the [Ryhope network](#) on [Pando](#). [Clément Lesaege](#) introduced us to [Kleros](#) and put a lot of [Doges on trial](#). [Horatii Partners](#) unveiled their concept for a DAO Incubator and last but not least, the Genesis Alpha DAO pollinators shared their experiences, hopes and dreams in panel format.

How to DAO #2 happened inside the confines of the Web3 summit bringing together an impressive panel of debaters for what turned out to be a heated (and yet amicable)

discussion. Captured in video, audio and as a Graphic Recording by pollinator Felipe Duarte from [Dupluswie](#) and planned collectively between Cem Dagdelen and Daniel Shavit from [Horatii Partners](#) and Kate Beecroft and Francesca Pick from [Greatherthan](#), our five strong panel were joined by an attentive and participant audience crammed in the Node 10 of the hackerspace for 1h30. We realized it's time to act!

Inspired by the amazing insight shared in between [Anish Mohamed](#), [Elad Verbin](#), [Kei Kreutler](#), [Wassim Alsindi](#) and [Daniel Shavit](#). We propose to you, **How to DAO #3: DAOs all the way down.**

So what now?

Organised and planned by Cem Dagdelen, Daniel Shavit, Theodor Beutel, Kate Beecroft and Felipe Duarte. We plan to invite everyone to get their hands dirty with DAOs - imaginary or real, human or autonomous - we'll support and facilitate a co-creative workshop format that will push our conception capacity to the limit:

What can DAOs, now and in the future, do and become? How to group them? How to value them?

How to DAO #3 will take explicit steps to COBUIDL a taxonomy for DAOs.

Budget

- Workshop Material and Refreshments
- Collaborative Methodology Development
- Compensation for Facilitators and Organisers and technical supporters
- Network orchestration
- Reporting and knowledge consolidation

19.5 ETH
Reputation: 0.65%

Budget Sharing Strategy and Reporting

Team will account for expenses and sharing, that will be done after the fact - by countabilizing true availability and contribution - if deemed necessary and fair, funds will be given back to the DAO.

Proposal's Authors

Cem Dagdelen - Network Orchestration

With a background in Investment Banking. Cem has collected awards in financial trading & innovation. Co-founder of Horatii Partners, he is an active researcher in decentralized governance & cryptoeconomic primitives. Specially interested in developing accountable and robust methods for the financing and investing in DAO Pilots and supporting independent research. Member of the Genesis Alpha DAO and sailor since the age of 9, he's all about bridging navigation and cartography for the future of the decentralised web.

CoFounder of [Horatii Partners](#).

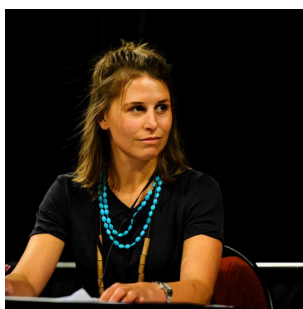

Daniel Shavit - Technical Support

With a background in Economics and Finance. Daniel is the crypto-economics specialist at Horatii Partners and the Fabrique du Futur think tank. He is the organizer of the annual Blockchain Agora conference in Paris and also runs executive awareness workshops. Currently advising projects in co-creation, collective intelligence and decentralized governance. Author of the DAO Defence Protocol version one and member of the Genesis Alpha DAOs own ATF, you can also find Daniel discussing crypto philosophy around Berlin or behind the pickups laying down some fat tunes.

CoFounder of [Horatii Partners](#).

Kate Beecroft - Facilitation

Kate Beecroft is a organization designer, community building and facilitator. She is a member of [Enspiral](#) (a global community who has been experimenting with decentralized, participatory and bossless ways of organizing for the last 7 years). She is co-founder at [Greaterthan](#), a collective and consultancy specialising in organization design, decentralized governance practises and community building for new systems. Greaterthan also houses Cobudget - an off-chain collaborative budgeting app for flat orgs. She engages in community building and facilitation for the Genesis Alpha DAO and consults on organization design and self management at ConsenSys. She is also co-founder and lead strategist at [Leadwise Academy](#) an immersive training academy for methods and approaches to new ways of organizing.

Founder of [Greaterthan](#), Co-founder of [Leadwise Academy](#), Member of [Enspiral](#).

Theodor Beutel - Technical Support

Theo Beutel (@theobt) has a background at the intersection of business and technology in information systems and innovation management. He currently works in research & communications with Bundesblock, the German blockchain association, and as a freelance researcher. In recent research, he discussed how blockchain relates to organisational theory and the visions that are driving

emerging field of blockchain-based governance. He also looked into usability issues by using agent-based modelling to simulate user adoption

Independent [Researcher](#), Research & Communications at [Bundesblock](#),

Felipe Duarte - Facilitation and Management

Originally an artist and activist, Felipe's experience on the ground during the social upheavals of Brazil over the last decade have shifted his reflections towards society and organisations. His involvement in initiatives that spearheaded social innovation movements in Rio led him to found and run companies, foster communities, create art shows and other activities in several fields. Now based in Berlin, he facilitates and consults for business, civil society and educational organisations alike. His activities conspire to evolve how we relate to each other and with our personal narratives, hopefully leaving the world a little more creative than before.

Founder of [Dupluswie](#), Treasurer of the [D.Collective](#), Lead Facilitator at [Redesign Democracy](#), Ex director of [Pira](#)
