# A Title Shuld be The Fewest Possible Words that Accurately Describe the Content of the Paper (Cambria, Left, Bold, 18pt). It should Have an English Title and Roman Script.

¹First Author*, ²Second Author, ³Third Author (12 pt)

¹ firstauthor@gmail.com, ² secondauthor@gmail.com, ³ thirdauthor@gmail.com
¹Northeast Normal University, PRC, ²University of Malaya, Malaysia, ³Universitas Ahmad Dahlan, Indonesia

ARTICLE INFO	ABSTRACT
	Type your abstract here (Cambria 10 pt). The abstract contains a brief, informative article summary of 150-250 words. The abstract includes an introduction (research problem/research gap), research methods, and results. The abstract must be written in **English**. A well-written abstract enables the reader to quickly and properly identify the basic content of a document, determine its relevance to their interests, and thus decide whether to read the document in its entirety. The keywords consist of 3-5 keywords or phrases, separated by a comma (,) and ending with a period (.).

1. Introduction/مقدمة

Papers should be original research contributions with a maximum of **25% similarity** to be checked using Turnitin or other tools. Articles should be written in Bahasa, English or Arabic and consist of a maximum of 20 pages (3000-7000 words). The article in Bahasa and English are written with **11 pt Cambria, Regular, spacing 1.5**. At the same time, the article in Arabic is written with **16 pt Sakkal Majalla and 1.5 spacing.** The citation format must follow the **APA 7th - American Psychological Association 7th Edition style**. Papers must be submitted electronically via open journal systems and register in website http://journal2.uad.ac.id/index.php/insyirah/index. **Please be aware that all authors are registered in open journal systems.**

The introduction should contain general issue in society (why your research is important for

general society? What is an important issue faced by society?), general problem (a general problem that motivates research in your field), literature synthesis (critically analyze advantage and disadvantage of previous research, and find research gap from previous research), research problem and research questions (details of research gaps that you found from previous research and will be answered with your research), proposed solutions and claims of novelty, and implications of the proposed solutions.

For an example of introduction, Indonesia is a big country with a tremendous population. At least 250 million people live in this whole archipelago area. It has a legendary title which is very popular. As Koes Plus sang, "people said that our land is a paradise land, wooden stick, and stone become plants." There are other similar compliments, one of them is 'the emerald equator', and so on. It shows how wealthy this country is. However, vice versa, all of us know well about the real condition of the society's welfare in Indonesia. So many jobless people and job vacancies cannot pervade all of the workers. It is very awful.

There are many assumptions that Indonesian society's mentality is agrarian, worker, and only can be labor, not a leader or activator. That assumption can be right. The fact is that the work community level is dominated by the young generation who look for job vacancies. In contrast, the job opportunity provided by the government does not match the flow of school and university graduates.

2. Method/منهج البحث

The method section structure should: describe the research design and research procedure, describe the materials used in the study, explain how the materials were prepared for the study, describe the research protocol, explain how measurements were made and what calculations were performed, and state which statistical tests were done to analyze the data.

3. Results and Discussion/نتائج البحث

Discussion is the interpretation of research results to find answers to problem formulations. The content of this section includes measuring the improvement of existing research methods, the implications of the research results on previous research (corroborating? Or is it just different? If it is different, why?), and the impact of the research results on common problems, and the interpretation of the results (generalizations, explanations of patterns that arise from the data, how errors occur). The result and discussion can be made in several sub-sections.

3.1. Chapter of Discussion in Paper (Capitalize Each Word)

3.1.1. Subsection (Sentence case)

[11 pt Cambria, Regular, with spacing 1,5] Paper length is limited to 20 pages (including all figures, tables, bibliography and appendices). Authors should follow the format found in the *Insyirah Template*. Papers should be in pages with a font size of 11 points using Cambria type for text, title, author information, and main section headings. Papers should be formatted for A4 paper. Top, bottom, and side left and Right margins should be 3 cm. followed by details of the methods, materials, procedures, and equipment used. Findings, discussion and conclusions should follow in that order. Appendices may be employed where appropriate. The APA Publication Manual should be consulted for details as needed.

3.2. Chapter of Discussion in Paper (Capitalize Each Word)

[11 pt Cambria, Regular, with spacing 1,5] example: Every country has a means of communication that can fluent a relation between persons. This means of communication is called language. English is a very important language in this world. It is the international language that is used by most countries in this world. (Yoyo, 2017) mentions five factors that have made English an international language:

a. Its internal linguistic features.

b. A large number of English speakers.

c. The wide geographical spread of where it is used.

[11pt. Cambria] Paper body note, table and pictures

Example, Multiculturalism is an ideology that confessed and glorified the difference in equality both individually as well as in culture (Nuryana, 2017). The culture that should be understood is not the culture in the narrow sense, but rather a culture is understood as all the dialectics of man against his life (Berry, 2003).
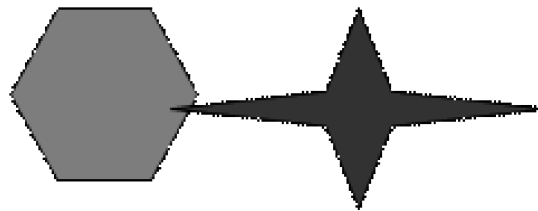

Table 1. Table captions should be placed above the table

Table	Header	Header 2	Header 3
Item 1	Aaa	Bbb	Ccc
Item 2	Ddd	Eee	Fff

[11 pt. Cambria Bold] Tables and Figures

Tables and figures should be incorporated in the text as close to the reference as possible and should be in a form suitable for publication when printed with a good quality laser printer. Figures will be printed in black and white and should be readily interpreted without the use of color. Tables and figures may extend across both columns (Rahman, 2016).

Captions should be Cambria 11-point, centered. Tables and pictures should be sequentially numbered in separate series. Captions for tables should be above the table. Captions for figures should be below the figure (Fauzi, 2017).

[Caption: Cambria. Centered, 11 pt]
Figure 1. Captions for figures should be below the figure

4. Conclusion/الخلاصة

[11 pt Cambria, Regular, with spacing 1, 5 in 1-2 paragraph]. The conclusion contains the answer to the objectives or formulation of the problem in the research and the solutions offered. Mention the important message of your research results. Conclusions may also contain limitations and recommendations. Limitations mention the limitations and weaknesses of your research. Meanwhile, the recommendations are related to things that other researchers can do to correct the weaknesses of your research. Example: Social welfare, especially in Indonesia always becomes an interesting topic to be discussed. It can be separated with the education. One of subject that has been taught in every level of education in Indonesia is Eglish. It has an important role in increasing the social welfare in Indonesia. By having a good mastery in English, people will have more opportunity to get a better job than others. In consequence, it will improve their income and get an improvement in their social welfare.

قائمة المراجع/References

[11 pt. Cambria, 1 spacing] Articles must meet a minimum number of references of **20 references (with 80% of references being articles or proceedings)**. The primary references are international journals, proceedings, and books. All references should be to the most relevant and up-to-date sources. References are written in **APA 7th - American Psychological Association 7th Edition style**. Reference writing **has to** use reference management applications such as **Mendeley, Zotero, EndNote, and others**. Please use a consistent format for references – see examples below:

Author Checklist

Authors of all papers should submit his manuscript including this author checklist.

No	Submission's Compliance	Yes	No
1	Manuscript has used the journal template		
2	Maximum similarity 25%		
3	Compatible with the focus and scope of the journal		
4	Using good and correct language		
5	Minimum 20 references (80% articles/proceedings/book chapter)		
6	Reference writing follows APA 7th edition		
7	All authors are registered in open journal systems (OJS)
