2. Add-on installing
3. Getting captcha keys
4. Add-on settings
5. Usage example

1. Overview

The “**hCaptcha**” addon integrates the captcha service into your store to protect your site from bots.

1.1 Support

This add-on is developed and published by eCom Labs, a CS-Cart developer. If you need help to install, set-up or customize it, please contact us via Helpdesk (helpdesk@ecom-labs.com).

1.2 Compatibility

The add-on is compatible with CS-Cart и Multi-Vendor **4.5.x — 4.18.x**.

1.3 Buy now

2. Installing the add-on

The installation package will be available for download on the Order detail page.

1. Log in the administration panel and go to the **Add-ons -> Manage add-ons** page
2. Use the **Upload & install add-on** button on the top of the page to install the add-on
3. Make sure that the status of the add-on is **Active** after the installation is finished

If you have any problems with add-on installation or turning it on, please contact us:

helpdesk@ecom-labs.com

3. Getting captcha keys

1. Go to the website: hcaptcha.com
2. Click on “Register”
3. Choose a free data plan (**1 million requests per month**)
4. Select “Add hCaptcha to my website or app”

5. Fill out the registration form (do not use mailboxes of Russian companies, for example, such as @mail.ru or @yandex.ru and others. Use Yahoo mail, Gmail, Outlook, or one-time mail)
6. In the next step, come up with a password
7. After registration, log in to the site
8. Copy the Site Key and save it
9. Click the "Generate" button below and wait for the secret key to appear, copy it and save it in a safe place, the secret key will not be shown anywhere else when you leave this page

10. Go to the admin panel of your site and paste the keys into the appropriate fields in the captcha module settings. Save the changes.

General Settings Information

To use the module, you need a **site key** and **secret key**.

You can obtain them on the hCaptcha website:

- 1) Go to [hCaptcha](#) and click "Sign Up"
- 2) Choose a free plan
- 3) On the next step, click "Add hCaptcha to my website or application"
- 4) Complete the registration
- 5) After registration and authorization, you will be redirected to a page where the Site Key will be displayed. Copy it and paste it into the module settings
- 6) On the same page, below the Site Key, there will be a "Generate" button. Click it and wait for the secret key to be generated. Copy it, paste it into the module settings, and save the changes.
- 7) Store the secret key in a secure place
- 8) At the bottom of the page, click the "Continue" button

Version: 1.0

The appearance of the captcha can also be customized. You can choose the color of the design and the size of the captcha.

4. Addon settings

Under the keys entry fields there is a list of all forms of the site where the captcha can be used. Select the forms necessary to protect against bots and set the switch to the “Use” position.

If you have several storefronts, then you can specify for each storefront a list of forms where the captcha will be used. To switch between storefronts, use the switch in the upper right corner.
