

Chapter 1: MATTER WAVES and Future Nobel Prize Winning Ideas of Mine.

Capítulo 1: ONDAS DE MATERIA y futuras ideas más ganadoras del Premio Nobel.

I developed the ability to see my memories as a clearly as I see with my eyes, in full color, and I can rock these matter waves forward and backward by shifting my focus within temperatures.

Desarrollé la capacidad de ver mis recuerdos con tanta claridad como los veo con mis ojos, a todo color, y puedo mover estas ondas de materia hacia adelante y hacia atrás cambiando mi enfoque dentro de las temperaturas.

WARMER is the future.
COLDER is the past.

MÁS CALIENTE es el futuro.
MÁS FRÍO es el pasado.

Matter wave of a car exiting the parking lot. Full color. I turn my head, so while I'm viewing a full color image of this outbound car, my back is to the car. I shift my focus from COLD to the WARMTH between two fingers and the full color matter wave set shifts into the future. Well did the car turn as the matter wave shifted?

Ola de materia de un coche saliendo del aparcamiento. A todo color. Giro la cabeza, de modo que mientras veo una imagen a todo color de este auto en salida, estoy de espaldas al auto. Cambio mi enfoque del FRÍO al CALIENTE entre dos dedos y el conjunto de ondas de materia a todo color se desplaza hacia el futuro. Bueno, ¿giró el auto cuando la onda de materia cambió?

I tested this while working at Glacier National Park and most of the time the two lined up. One time a car shifted BACKWARDS in time, through a cold Montana night sky all the way back to the car at the car factory, PRE PAINT!!!

Probé esto mientras trabajaba en el Parque Nacional Glacier y la mayor parte del tiempo los dos estaban alineados. Una vez, un automóvil retrocedió en el tiempo, a través de un frío cielo nocturno de Montana, hasta llegar al automóvil en la fábrica de automóviles, ¡¡¡PINTADO PREVIA!!!

So it doesn't always work. I can run anything back in time and I don't just use a shift of my focus within temperatures to shift around within these matter waves, I'll run an expect set with a shadow.

Entonces no siempre funciona. Puedo mover cualquier cosa atrás en el tiempo y no solo uso un cambio de mi enfoque dentro de las temperaturas para moverme dentro de estas ondas de materia, me moveré a cualquier lugar usando una sombra.

If you imagine all forward motion as a gravity fall, this makes sense. Temperature increases towards a gravity center. So WARMER is forward motion. Within the animal system you can imagine your full self as COLDER inhale and warmer exhale. The COLD did a gravity fall within the relative matter wave sets of Oxygen, a corollary of our solar system, within my theory I hope to win the Nobel Prize for.

Si imagina todo movimiento hacia adelante como una caída por gravedad, esto tiene sentido. La temperatura aumenta hacia un centro de gravedad. Entonces MÁS CALIENTE es movimiento hacia adelante. Dentro del sistema animal, puedes imaginarte a ti mismo como una inhalación MÁS FRÍA y una exhalación más cálida. El FRÍO cayó dentro de ondas de materia relativas de Oxígeno, un corolario de nuestro sistema solar. Los átomos como corolarios de conjuntos más grandes es una teoría por la que espero ganar el Premio Nobel.

Imagine atoms as formed from larger macro sets. Our solar system with 8 planets, waves itself out and becomes the OORT with OXYGEN in the frozen water out there. Oxygen has 8 electrons. So imagine Oxygen as a matter corollary of the solar system.

Imaginemos que los átomos se forman a partir de macroconjuntos más grandes. Nuestro sistema solar con 8 planetas se agita y se convierte en el OORT con OXÍGENO en el agua congelada que hay ahí fuera. El oxígeno tiene 8 electrones. Así que imaginemos el oxígeno como una materia corolaria del sistema solar.

I shift these matter waves around all the time, so I think in terms of matter waves, and like I mentioned, I hope to win a Nobel PRIZE for this theory of matter. I hope to win 3 other Nobel Prizes as well.

Altero estas ondas de materia todo el tiempo, así que pienso en términos de ondas de materia y, como mencioné, espero ganar un PREMIO Nobel por esta teoría de la materia. Espero ganar también otros 3 premios Nobel.

- 1) Theory of matter: all atoms formed as exit waves off of larger macro sets.

Teoría de la materia: todos los átomos se formaron como ondas de salida de macroconjuntos más grandes.

- 2) Matter FEELS!: The brain is electromagnetic and so are atoms. Feeling is simply electromagnetism. So after I win the Nobel Prize for Matter Feels, we won't use OVENS any longer!!! Your STOVE lives in COMPLETE HELL!!!

¡La Materia SIENTE!: El cerebro es electromagnético y los átomos también. El sentimiento es simplemente electromagnetismo. Entonces, después de que gane el Premio Nobel por Matter Feels, ¡¡¡ya no usaremos HORNOS!!! ¡¡¡Tu ESTUFA vive en COMPLETO INFIERNO!!!

- 3) Theory of Lightning and Magnet formation: Imagine photons in between all seeds of life. Seeds are part of a loop. Tree, seed, tree, seed, tree, seed. This LOOP will include other matter waves and according to my theory, in the case of lightning, PHOTONS are set IN BETWEEN all these ongoing LOOPS, gain strength and then STRIKE!!! Now down in the Earth is a MAGNET, formed as the lightning fused the IRON in the dirt. Well why is the magnet in a loop. Well the ANSWER, according to my theory: the magnet was part of the SEED loop that caught these photons in it, that gained strength and the STRIKE!!! So now the fused IRON is in a loop.

Teoría de los relámpagos y la formación de imanes: imagine fotones entre todas las semillas de la vida. Las semillas son parte de un bucle. Árbol, semilla, árbol, semilla, árbol, semilla. Este BUCLE incluirá otras ondas de materia y, según mi teoría, en el caso de un rayo, los FOTONES se colocan ENTRE todos estos BUCLES en curso, ganan fuerza y luego ¡¡¡GOLPE!!! Ahora, abajo en la Tierra hay un IMÁN, formado cuando el rayo fusionó el HIERRO en la tierra. Bueno, ¿por qué el imán está en un bucle? Bueno la RESPUESTA, según mi teoría: el imán era parte del bucle SEMILLA que atrapó en él estos fotones, eso ganó fuerza y ¡¡¡HUELGA!!! Así que ahora el HIERRO fusionado está en un bucle.

- 4) Theory of DNA: Earth and the Moon. What did we do on the Earth and the Moon. That matter wave set WAVES out, becoming smaller and smaller, becoming DNA!!

Teoría del ADN: la Tierra y la Luna. ¿Qué hicimos en la Tierra y la Luna? ¡¡Esa onda de materia formó ONDAS, volviéndose cada vez más pequeñas, convirtiéndose en ADN!!

Chapter 2: Matter Waves and Micro Earth Systems, And Elephants In Egypt

Capítulo 2: Ondas de materia, microsistemas terrestres y elefantes en Egipto

I LOVE this view of matter as a WAVE form. One day I was thinking about a particle. What is a PARTICLE? I thought about it for a bit and decided on an orbiting wave set as a good description of particles. It's all a WAVE form. And because I have this ability to SHIFT these wave forms around, this all made even MORE sense to me.

ME ENCANTA esta visión de la materia como una forma de ONDA. Un día estaba pensando en una partícula. ¿Qué es una PARTÍCULA? Lo pensé un momento y me decidí por un conjunto de ondas en órbita como una buena descripción de las partículas. Es todo una forma de ONDA. Y como tengo la capacidad de CAMBIAR estas formas de onda, todo esto tenía aún MÁS sentido para mí.

The PAST is colder
The FUTURE is WARMER.

El PASADO es más frío
El FUTURO es MÁS CALIENTE.

As you warm matter, it's speed increases. Colder matter moves SLOWER. So in COLD, there are all these PAST matter wave corollaries. If you look at a photo of the pyramids for example, related to COLDER, is a SHIFT of those pyramids into the PAST, when those pyramids were being BUILT!!! I see these shifts.

A medida que calientas la materia, su velocidad aumenta. La materia más fría se mueve MÁS LENTO. Entonces, en FRÍO, están todos estos corolarios de ondas de materia PASADA. Si miras una foto de las pirámides, por ejemplo, relacionada con MÁS FRÍO, es un CAMBIO de esas pirámides hacia el PASADO, ¡cuando esas pirámides estaban siendo CONSTRUIDAS! Veo estos cambios.

The PAST is colder
The FUTURE is warmer.

El PASADO es más frío
El FUTURO es más cálido.

WHOA! Elephants were moving blocks around when the pyramids were constructed. In other words a matter wave relative set, gave me a view of ACTUAL elephants moving these blocks around. You remember in school when they were puzzling over this? "Here's what they think class, lot's of people, pulling on ropes shifted these blocks around." Well ELEPHANTS make complete sense after you SEE the elephants.

¡GUAU! Los elefantes movían bloques cuando se construyeron las pirámides. En otras palabras, un conjunto relativo de ondas de materia me dio una visión de elefantes REALES moviendo estos bloques. ¿Recuerdas en la escuela cuando estaban desconcertados sobre esto? "Esto es lo que piensan, clase: mucha gente, tirando de cuerdas, movió estos bloques". Bueno, LOS ELEFANTES tienen mucho sentido después de VER a los elefantes.

The PAST is colder
The FUTURE is warmer

El PASADO es más frío
El FUTURO es más cálido

And relative to ANY matter set you look at is the past and the future within COLDER and WARMER. So an image of the pyramids, WOOP, to the past you go, relative to COLDER. And WHOA, relative to those pyramids, ELEPHANTS are pulling blocks!!! THAT'S how they did it!!

Y en relación con CUALQUIER conjunto de asuntos que mires, está el pasado y el futuro dentro de MÁS FRÍO y MÁS CALIENTE. Entonces una imagen de las pirámides, WOOP, al pasado vas, en relación con MÁS FRÍO. Y ¡¡¡Vaya, en relación con esas pirámides, los ELEFANTES son bloques en movimiento!!! ¡¡¡ASÍ lo hicieron!!

Matter Waves, Micro Earth Systems, and Fixing the Universe

Ondas de materia, microsistemas terrestres y reparación del universo

Now in these micro matter wave Earths are little relative copies of you and I. Now what do we do as a relative copy of ourself living in the past. You remember the English language is a recent Earth creation. The oldest English writing is dated to the 1120s [1]. That's only 903 years since 2023, which is the year of writing this line.

En estas micro Tierras hay pequeñas copias de nosotros. Ahora bien, ¿qué hacemos como una copia relativa de nosotros mismos viviendo en el pasado? Recuerde que el idioma inglés es una creación reciente de la Tierra. La escritura inglesa más antigua data de la década de 1120 [1]. Son solo 903 años desde 2023, que es el año en que escribí esta línea.

Through a relative colder set, we shift to a matter wave set of the pyramids being constructed. We're there. We're literally there, as a shift between our current 2023 through colder to a stable micro Earth matter wave set back during the pyramids. There are no English speakers.

A través de un conjunto relativamente más frío, pasamos a un conjunto de ondas de materia de las pirámides que se están construyendo. Estamos ahí. Estamos literalmente allí, como un cambio entre nuestro actual 2023, pasando por un período más frío, hacia un conjunto estable de microondas de materia terrestre de las pirámides del pasado. No hay hablantes de inglés.

What do you do in this world? How do you build your micro Earth if you know matter feels. You don't COOK!! You KNOW magnets are created as fused iron in the ground, underneath lightning strikes. You KNOW how to track these lightning strikes down to dig them up with triangulation. You KNOW how to build radio and electricity from these lightning strike magnets. You know these magnets will pull iron up out of the Earth.

¿Qué haces en este mundo? ¿Cómo construyes tu micro Tierra si sabes que la materia se siente? ¡¡No cocinas!! SABES que los imanes se crean como hierro fundido en el suelo, debajo

de los rayos. SABE cómo rastrear estos rayos para desenterrarlos con triangulación. SABES cómo construir radio y electricidad a partir de estos imanes de rayos. Sabes que estos imanes sacarán el hierro de la Tierra.

But you also know that iron you pull out of the ground will be in EXTREME pain when you melt it to create your iron tools. You KNOW how to make radio, electricity. You know how to make gasoline engines, how to mind find for Petroleum and how to boil the petroleum and create gasoline. But you DON'T. Because that future Earth creates a HUGE hell for Iron.

Pero también sabes que el hierro que extraes del suelo sufrirá un dolor EXTREMO cuando lo derritas para crear tus herramientas de hierro. SABES cómo hacer radio, electricidad. Sabes cómo fabricar motores de gasolina, cómo encontrar petróleo y cómo hervir el petróleo y crear gasolina. Pero NO LO HACES. Porque esa Tierra futura crea un ENORME infierno para el Hierro.

We want a COLLISION free Universe with no graviton collision systems keeping the Sun lit and the center of the Earth lit. Imagine instead of going the technology route, you create an Earth with an Ethos of MATTER FEELS and mind MASTERY where your descendants are MIND masters that create creatures with their expect to PERFECT.

Queremos un Universo libre de COLISIONES, sin sistemas de colisión de gravitones que mantengan iluminado el Sol y el centro de la Tierra. Imagínese que en lugar de seguir la ruta de la tecnología, usted crea una Tierra con un Ethos de materia como nosotros y MASTERÍA de la mente donde sus descendientes son maestros de la MENTE que crean criaturas con la esperanza de PERFECCIONAR.

You can't beat expect to perfect. If you imagine all forward motion as gravity fall, then from a shadow you have more falls. With expect you can become a bird, when you're outside, so the corollary birds you connect to don't fly into hard things inside!!! Now part of you is a bird.

No hay nada mejor que esperar ser perfecto. Si imaginas todo el movimiento hacia adelante como caída de gravedad, entonces desde una sombra tendrás más caídas. Si imaginas que eres un pájaro en vuelo cuando estás afuera, para que los pájaros no golpeen cosas duras dentro de tu casa, una copia de ti se convierte en un pájaro.

The brain is a simple expect set group. Ultimately we're all just a gravity fall. Cold breathe, inhale to warmer and then exhale. And your warm exhale hits colder and rewinds your corollaries.

El cerebro es un grupo de expectativas simple. Al final, todos somos solo una caída de gravedad. Respire en frío, inhale para calentarse y luego exhale. Y tu cálida exhalación golpea más fría y rebobina tus corolarios.

COLDER is the PAST

WARMER is the FUTURE.

MÁS FRÍO es el PASADO
MÁS CALIENTE es el FUTURO.

BIRDS have the ultimate future view. Their body temperature is 105 F. Our's is 98.6 F. So the bird lives in the future. With that warm body temperature, the bird sees our future as it flies up high in the air.

Los AVES tienen la mejor visión del futuro. Su temperatura corporal es de 105 F. La nuestra es de 98,6 F. Entonces el pájaro vive en el futuro. Con esa cálida temperatura corporal, el pájaro ve nuestro futuro mientras vuela alto en el aire.

COLDER is the PAST
WARMER is the FUTURE

MÁS FRÍO es el PASADO
MÁS CALIENTE es el FUTURO

When you WARM matter, it speeds up!!! And this is what I discovered at Glacier. I could shift these full color matter waves of exiting cars, FORWARD and then see if the shifted matter wave matched the car exit I was seeing. Most of the time the two lined up. But not always. VWOOP, through cold Montana night sky and the car is now at the FACTORY, PRE PAINT!!! Not what I was looking for, but still cool.

¡¡¡Cuando CALIENTE la materia, se acelera!!! Y esto es lo que descubrí en el Parque Nacional Glacier. Podría cambiar estas ondas de materia a todo color de los autos que salen, HACIA ADELANTE y luego ver si la onda de materia desplazada coincidía con la salida del auto que estaba viendo. La mayor parte del tiempo los dos estaban alineados. Pero no siempre. VWOOP, a través del frío cielo nocturno de Montana y el auto ahora está en la FÁBRICA, ¡¡¡PRE PINTURA!!! No es lo que estaba buscando, pero sigue siendo genial.

But back to point. A corollary you is now in micro matter wave set of the Earth around the pyramid construction. You know how to construct technology. You know it's as simple as tracking down lightning and digging up magnets. But you know MATTER FEELS!!!! The brain is electromagnetic and so is matter. Feeling is simply electromagnetism. So you don't go this route. You go the NATURAL route with your clan.

You DEFINITELY don't go the murder animals for FOOD route. You go the grow your own food with no technology. You're into COVERING the hot ground with clever ROLLING systems. Rolling so the cloth is never exposed to the Sun to the point where it hurts.

The ground LOVES you!!! I measured the ground temperature one day. 133F!!!! I measured my threshold for pain. 122F!!!! Well the ground sits there ALL DAY LONG, waiting for the shade from Earth's rotation, to cool the day. And then it's too COLD!!!

So rather than setting about tracking down magnets with triangulation teams and setting about killing animals for food, the murderer way, you set about making the universe PERFECT with your MIND skill. That GROUND is ENTHRALLED by you covers, that ROLL to keep their OWN temperature at perfect temperature.

The plants you eat are never cooked, so your clan is the rare GENIUS that doesn't cook the micro matter wave corollary Earths inside them. Fully functioning Earth corollaries with such genius routines, they BECAME that fruit!!!! Well in comes human and throws this wonderful fruit into the OVEN!!! EXTREME hell for that fruit.

The brain is electromagnetic and so are atoms, so atoms FEEL. Feeling is simply electromagnetism.

And you're a mind master. So your colony grow their own food, do mind master work and fix the universe with expect to perfect using shadows for the most possible gravity falls!!!

If forward motion is simply a gravity fall. Cold breathe, into your body. Colder to warmer. Mass centers are warmer. And we can maneuver around these corollary matter wave sets with expect. Remember you can expect your way into a bird. The brain is an expect set. So now we simply extend becoming a bird as a simple brain expect routine of my next move is a fancy flight, while I'm outside, so the bird matter wave corollaries don't slam into the walls of your house. We simply EXTEND this concept of the brain is expect into ALL MATTER with a simple routine of EXPECT to PERFECT.

And we use a SHADOW, so we have the most FALLS, or forward motion, as POSSIBLE!!! If all forward motion is a gravity fall, we need the OPPOSITE of center mass for the most possible expect sets, so we use SHADOWS, ALL THE TIME!!!

With a shadow you simply expect to PERFECT. Now if you imagine the universe as a matter wave set, there's the entire universe as a relative matter wave set, in your consciousness. So you're really expecting to perfect in a UNIVERSE!!!!

If you lose your shadow, you can't go to as many places. So we expect to perfect with a shadow, so we have more places to FALL to.

If all forward motion is simply a gravity fall, then maximize our expect to perfect with a shadow. And what you'll create is absolutely incredible. Cars will be transformed into electromagnetic vehicles that maneuver with the adjustment of larger matter wave cell phone towers.

It's a simple routine. With a SHADOW, you simply expect your're heading to perfect. And through time, your clan transforms the universe to perfect. Your expect to perfect team doesn't use technology, but the creatures they create are PERFECT for fixing the universe. They fly around on beetles. They transport from place to place as a simple matter wave shift without walking. It's expect to perfect in a UNIVERSE, so your clan is creating GENIUS things all day. With no technology that tortures matter.

The fruit you eat that grew on your land didn't go through a torture route for the car engines and the oil, it grew in your garden. Passes through you and on to your biodigestor, where it's kept at a good temperature. The methane is not BURNED, because the methane is literally YOU. Your clan uses the methane for balloons to lift stuff.

Your clan know how to make technology with all the HOT, EVIL hells humans create, but they choose not to. They live a comfortable life, eating fruit off their own land and making the universe PERFECT with their mind routine of expect to perfect.

This means no radio, no cars. But we can still make books and mass produce books. We just can't use metal. So we use wood, printing presses for mass production of books.

Equal Partnerships of Mind Master Clan

At our matter level we have governments that use a force model. They tax people and create stuff for our benefit. We love the benefits of schools, roads, police, the military, and all the other agencies that do wonderful work.

But imagine an equal partnership model. Roads, police, schools, the military, the FBI, all become equal partnerships. Businesses are created with the equal partnership transition software.

In our micro Earth, where we decided be a clan foregoing lightning strike triangulation in favor of straight natural. We cover the land and the land LOVES us. We grow our own food and don't replicate the CAR ENGINE hot hell and the Petroleum hot hell. Our plants LOVE us because we warm them to our 98.6 degree body and then pass them on to our biodigestor we keep at perfect temperature, that creates our fertilizer and our methane, which we don't burn because we literally BECAME the methane. We use the methane to fill balloons.

We didn't track down lightning strikes because we want a society with no extreme hells created by humans. No freezers and no ovens. No car engines. No radio. No EXTREME collisions introduced by humans.

We fix the universe by making plants, animals and the earth feel happy. Our government structures are not government structures at all. They're simply equal partnerships. If you want to be a member of the police equal partnership, you have to join it. Now you're an equal partner.

Murders occur! Robberies occur! Police are VITAL! Very vital groups governments have built using the force model of taxation, we build as equal partnerships.

Our money among trusted clans is simply a random number we record at the end of the day. The wood dice roll and print a random number for our workers, who are paid according to our equal partners.

Because we want an equal society, we don't the Earth controlled by a minority of wealthy individuals. We want society controlled by MANY people. So have a tax the wealthy equal partnership that taxes all wealthy above whatever they determine. This equal partnership is composed of at least 80% of society.

If this Tax the wealthy equal partnership decides to tax all wealth beyond a million, then that's what we do. If that amount is \$500,000, then we tax everything beyond \$500,000.

We live in a society where 39% of the population can't afford \$400, so I'm curious what this Tax equal partnership determines the tax should be, to maintain an equal society. I bet this group determines everything above \$1,000,000 to be taxed.

Matter wave corollary of our matter level down to really small and you're down there. So what kind of a society do you create? My clan builds equal partnerships. The same equal partnership build system also builds equal partnership BUSINESSES!!!

And our currency among trusted equal partnerships: a random number for hours worked.

Words, Seeds and the Speed of Replication

Every word you think will replicate very quickly and we live forever. We always bend bad concepts into good and rewind bad with cold. The words "snow ice water" will rewind bad matter matter waves backwards and if you have more precise cooling, you can rewind precisely. That crypto looks secure but if we rewind the matter wave, we have the original message.

Every word you think will replicate in your system, so we think good words and rewind the bad out of of us with "snow ice water."

Cold is the past but it will also REWIND matter waves BACKWARD. So we don't end up in a vegetable, pre oven, we use the words "ice water" with the word snow.

It becomes a word play. Incoming bad word becomes better as we roll the bad to become better. If we don't the bad will replicate in our system. All seeds we eat will replicate all matter waves. And replication happens fast.

- 1) 1
- 2) 2

- 3) 4
- 4) 8
- 5) 16
- 6) 32
- 7) 64
- 8) 128
- 9) 256
- 10) 512
- 11) 1,024
- 12) 2,048
- 13) 4,096
- 14) 8,192
- 15) 16,384
- 16) 32,768
- 17) 65,536
- 18) 131,072
- 19) 262,144
- 20) 524,288
- 21) 1,048,576
- 22) 2,097,152
- 23) 4,194,304
- 24) 8,388,608
- 25) 16,777,216
- 26) 33,554,432
- 27) 67,108,864
- 28) 134,217,728
- 29) 268,435,456
- 30) 536,870,912

- 31) 1,073,741,824

In 31 doublings, starting from 1, were already at a billion!!! It's easier to see the volume increase visually:

- 1) 1=
- 2) 2==
- 3) 4====
- 4) 8=====
- 5) 16=====
- 6) 32=====
- 7) 64=====

And that's only 7 doublings!!!! Every word you think will replicate this fast. So how much beauty can you surround yourself with. Your system replicates that beauty for the world. All kindness for all matter replicates that fast. Your expect to PERFECT will replicate that fast!!!

Expect to Perfect And Original Lightning Strikes

The past is COLDER

The future is WARMER

Now imagine your expect to perfect rewinds a micro matter corollary of the ORIGINAL lightning strikes that created all the magnets humans dug up to pull up iron, melt it, and on to radio, stoves, car engines and all the other human created HOT hells your stove is justified MURDERING YOU AWAY for.

The PAST is colder

The FUTURE is warmer

And in COLDER, we find these original lightning strikes that are still replicating in all magnets of all devices today: computers, car alternators, dam generators, power group turbines, you name it. Today they make magnets by running electricity through molten metal and letting it cool, but because the original electricity required finding magnets underneath lightning strikes, those original lightning created magnet structures as a matter wave are in all magnets created to this day.

Our expect to perfect rewinds these original lightning strikes and fire inventions backwards and creates a perfect Earth within that matter wave corollary.

Vibration Sets

Hz = cycles per second

All vibration sets are hell bros. "In general, men's vocal folds can vibrate from 90 - 500 Hz, and they average about 115 Hz in conversation. Women's vocal folds can vibrate from 150 -1000 Hz, and they average about 200 Hz in conversation." [3] Just SPEAKING creates complete hell for matter.

The frequency of the Sun ranges from 1,000,000,000,000,000,000 Hz ... down to a sedate 10,000 cycles per second. [4]

You can stop ALL these vibrate sets with the words "SNOW, ice water." Ice water so we don't end up in a frozen vegetable, PRE OVEN!!!

Our ideal universe is a NO vibrate universe and if we run expect to perfect a lot, then we MUST be creating this universe. A universe with no ovens, no car engines, no computers, no television, no radio. Our micro Earth is a letter writing universe with no fire. No warmth to heat ourselves is ever hotter than 122 F, unless the warmth already exists, like the Sun, or warmth from deep in the Earth.

Our micro crew builds creatures that shift the universe to perfect with a simple expect routine: expect to perfect.

If you think of matter as a wave form, these matter waves that shift the entire universe to perfect are very close. It's just a SHORT matter wave shift and you're there, in a vehicle, flying around in a larger matter wave group, flying a transformation of your car, into an electromagnetic vehicle, maneuvered by adjusting cell phone signals.

Or a slight matter wave shift and you are part of the human crew of a BEETLE, which you LOVE, because he's a non murdering insect and flies your entire crew from place to place. Or a slight matter wave shift and you're a human crew inside a honey bee, that fly from flower to flower all day, absorbing the best smells, all day.

I love this idea of our Sun as an exit photon.

Murder Check System

Murderers are very rare in society, but they exist!! Many became quite wealthy. Notice our Constitution didn't allow women the right to vote. Saudi Arabia didn't allow women the right to vote until 2015! Saudi Arabia is currently a country run by murderers. They killed a Washington Post contributor in their Saudi Arabian embassy in Turkey. Murderers kill, rob and then move on and you can become very WEALTHY as a murderer. They run STATES!!!

So our micro matter wave clan of mind masters have a murder check system in place. If a murder occurs, we all know. And because there enough of us in a region with this system, we know the murderers direction of travel!!!!

These three people didn't check in, in THIS order. The murderer appears to be heading WEST!!

Multiple Copies of You and Fixing the Universe

Imagine all you do all day is hump multiple copies of your wife all day. You live a life within electromagnetic horny, fixing the universe. I discovered electromagnetic horny is a matter replicator, so imagine their matter wave replication does NOTHING but replicate EXACTLY what

is needed by the universe as a build with expect to perfect. All you do is hump the many copies of your wife all day! Or if you're a woman, all you do is hump the many copies of your husband.

Electromagnetic horny is a matter replicator so it will replicate ITSELF!!! So it becomes more and more intense through time. COLD to rewind bad from replicating in your HUMP is SUPER important. But if this is a hump team built with expect to PERFECT, your SET!!! No bad ever enters your team, it was rewound automatically as part of the expect to perfect build and you and your hump team become hornier and hornier FOREVER, until the universe is fixed, with NO BAD EVER ENTERING YOUR HUMP TEAM!!! All bad was AUTOMATICALLY rewound out of your crew as part of the expect to perfect.

Laughing Mind Expect

There's expect to perfect using a shadow and there's also laughing mind expect. Here you simply imagine a point says something HILARIOUS that makes everyone to the horizon laugh intensely and you'll hear comedy. The problem of course is we're creating a friction set which is counter to our goal of a no collision universe.

You can't beat expect to perfect. When I run expect perfect music, I'll often connect to a sequence of decreasing vibration to a stop. Which makes sense. The collision set is HELL for matter, while the no collision state is WAY better. A matter corollary of a head smacking against a tree may have pleased the entire land all the way to the horizon, but the owner of the head is not happy. So we run expect to perfect with a shadow on the head and find very long SHADOW sets.

Here shadows are the opposite of the collision sets of photons. You can imagine photons as corollary matter waves of our Sun, kept HOT with gravitons COLLIDING into the Sun's CENTER. Shadows are happier than the 133 F ground.

The weather people don't report the temperature this way. The thermometer under the shade may say 80 F, but when I measure the ground I find the temperature to be WAY beyond my threshold of pain, of 122 F. I find the ground temperature to be 133 F!!!

The shadows are HEAVEN compared to this hot hell!

As long as you have a shadow, you can get anywhere. Yes, photons are pulled in by gravity so your shadow blocking bodies out in space don't create shadows that extend out FOREVER, but there's always a LONGER shadow even FURTHER from the SUN, so our expect to perfect that moved a matter wave of a head smacking against something hard to PERFECT has an even longer shadow further out in space. And seeds will replicate these expect to perfect routines very quickly!

- 1) 1=
- 2) 2==

- 3) 4=====
- 4) 8=====
- 5) 16=====
- 6) 32=====
- 7) 64=====

That's only 7 iterations of doubling our expect to perfect. At 31 iterations we've surpassed a billion!!!

Shaping FUTURE Thoughts!!

The past is COLDER
The future is WARMER

So how much can you cool down to see the MOST into the future. You can imagine some of these expect to perfect systems thought shape the entire planet using this future view.

Cooling How I Feel, Electromagnetic Horny, Curing Cancer/HIV/Acne

I can see my memories as clearly as I see with my eyes, and I figured out how to cool how I feel down from 80 to 72. I used videos of snow, which I discovered, form a matter corollary as you watch them. One snowflake motion down, retain that snowflake, then the next snowflake fall, then the next. Now I have 3 sets of snowflake fall memory sets near my conscious center. I noticed keeping all these matter corollary sets of snowflakes near my conscious center would cool how I feel down from 80 to 72.

I did the same maneuver using electromagnetic, using photos of attractive women, and electromagnetic horny has been running straight solid ever since.

I noticed electromagnetic horny is a mind bonder and ran some tests when I was working at Glacier National Park. An attractive girl running through the park. I run electromagnetic horny on her from afar and I notice I could see more of her mind.

Later I discovered electromagnetic horny is a matter replicator, and by logical extension, ALL seeds are matter wave replicators. I theorize cancer, HIV and acne are any HOT sets, in replication with electromagnetic horny or another seed. You remember how fast replication happens. So imagine that alcohol you drank, set to replicate in your system. Or the matter wave of your water heater, set to replicate in your system. We drink cool water and breathe cool air, which is a counter, but you how fast replication happens!!! 31 iterations we're already at over a BILLION replications of whatever HOT!!!

I think breathing is a cold input requirement, rather than the Oxygen. Imagine there is a fall within Oxygen, which is a corollary of our solar system with it's 8 electrons. Imagine there is a fall within Oxygen to our 98.6 degree system and this movement from COOL to our warm 98.6 degree body is the really the necessary move!!! Here imagine the most relative to YOU of the matter wave of Oxygen moves from COOL to warm 98.6. And this fall from cool to WARM 98.6 is really the requirement. Forward motion as a gravity fall within the corollary matter wave set of Oxygen, a corollary of our solar system. 8 planets. 8 electrons. 8 planets wave themselves out and form the OORT which contains Oxygen with it's 8 electrons.

But to summarize. I figured out how to cool how I feel from 80 to 72. I used the same technique for electromagnetic horny and it's been running pretty much STRAIGHT for over a year! I discovered electromagnetic horny is a matter wave replicator and my matter wave exploration leads me to believe cancer, HIV and acne are any HOT matter waves in an exponentially expanding pattern that needs a COLD counter.

Fear, Hot/Cold, Predator Gravity Fall, and Surviving the OVEN!!!

COLD is extremely valuable. Imagine ourself as a matter wave set and we move off in any direction relative to what's in our body and what matter waves we absorb as incoming. You take a shower and now you've connected yourself to water in a hot water hear with a hot metal element that heats the water. You literally fall INTO the water heater element. We don't want to burn alive as matter, so the more COLD you have, the safer you are.

I noticed in FEAR, we'll shift off to be eaten by predator animals of the world. We want a NO FEAR system. My mind strategy is FIND COLD if fear enters me because I'd rather FREEZE than burn alive.

When my system falls into a metal vibrate set, I'll expect to perfect with a shadow and that will fix the fall. Humans have so much metal at such high temperature, but then there's no RECORD of them after matter wave copies of them fall into aluminum engines, hot stoves, light bulbs, you name it.

So for example, just eating cooked food will not only replicate the entire cook process and all the heat required to transport the food to your home, the cooked food connects you to a matter wave of a HOT STOVE, which we DON'T want to live inside!!!

I've seen matter waves that connect me to what I theorize is the EXACT food I ate in the FIELD it was GROWN. The HEAT from the STOVE puts us on the side of a corollary plant exposed to the SUN in the field. Well where is this plant heading to as a corollary matter wave of the food in the FIELD, with us very SMALL on the SUN exposed outer edge of the plant? STRAIGHT TO THE OVEN!!!

So to survive this future, we need to live in a COOLING system that can handle the heat from an OVEN. We're TINY on the outside of this plant. The heat from the STOVE correlated with the

SUN of the plant in the field and we're on the outer edge of the plant. But it's a COROLLARY of what we ate!! Meaning that PLANT we're very SMALL on, is heading down the SAME gravity route, straight into the STOVE, where we're COOKED ALIVE unless we have enough cooling to survive the stove.

Collision Sets as a Progression to Perfect

One system's warmth is another system's hell. A collision system of photons and here you can imagine photons as a matter wave corollary of the Sun. A collision system of photons is the warmth for COLD. One system's hell is another system's HEAVEN.

Imagine a perfect collision system as a progression from collision HELL to complete STOP! This progression forms music or words that shape the universe to optimum the quickest way possible, built with expect to perfect using a shadow.

Random Number Generator As a View of Your Computer

My Chromebook broke, so I was running Tails on my old laptop, throttling down the processor to keep the temperature below 122 F. You remember I measured 122 F to be my threshold for pain. Here I'm thinking, if the random number generator on this thing using whatever random noise of the computer, even if ciphered, the random number generator is a CRYSTAL CLEAR view of your computer!!! So I found a way to create a nice series of random numbers:

```
amnesia@amnesia:~$ for i in `seq 1 100000`; do hexdump -vn16 -e'4/4 "%08x" 1 "\n"
/dev/urandom; sleep .05; done;
```

And sure enough, I could see the electromagnetics of the computer!!! Ultimately there's no such thing as crypto because you can simply rewind the encrypted message with cold.

Keeping Passwords Safer

One part of your password is memorized. The other part is a random sequence of characters you write down.

For example:

[memorized bit] + ZREJdCZv1nbZosTJ8FHd
