**Web Developer for the Scratch Online Community**

The Lifelong Kindergarten group at the MIT Media Lab is looking for an experienced web developer to work on Scratch (http://scratch.mit.edu), the popular online community where young people (ages 8 and up) program and share interactive stories, games, and animations. Scratch is a vibrant online community with more than 1.5 million registered members.

We are seeking to hire someone full-time for at least three months, with the possibility of continuing to work on future Scratch initiatives. The focus of this contract work is on creating educator accounts on the Scratch website. Educator accounts will allow teachers to create student accounts, and view and manage their contributions via a dashboard.

**Responsibilities:**
- Lead the design and development of educator accounts within the Scratch Online Community (scratch.mit.edu)
- Work with members of the Scratch Team to advise and iterate on design and functionality

**Qualifications**
- Django, python, HTML, CSS, javascript, some sql experience
- Good understanding of usability and design
- Experience working on medium/large web applications

**How To Apply**
Send us your resume at scratch-jobs@media.mit.edu

*This position is based in Boston, MA.*
