

We are seeking a skilled web designer to adapt a Shopify template to fit precise design guidelines.

The content already exists and would be changed, so this is a pure aesthetic design job. We are not looking for wire-framing, user journey planning and such things.

This is a 2-day project requiring someone who can produce high-quality designs and implement them within the template we use. We are on a tight deadline and it needs to be completed in 2 days.

The ideal candidate should have a strong portfolio, and a keen eye for detail. We would need to see your portfolio and a brief introduction. Final designs should be supplied in Figma or similar for sign-off. This can include or exclude making the adaptations on the site itself.

Please share a quote for the job and relevant folio links to marketing@theprintspace.co.uk
