PERSONAL PROFILE

Frontend Engineer focused on building user-facing products with React, Next.js, and TypeScript. I've led frontend development across AI-driven and civic platforms, delivering features such as dashboards, booking systems, and real-time interactions. I enjoy working across the stack when needed, especially with APIs and data, and I'm driven by building systems that are intuitive, reliable, and impactful.

EDUCATION

Middlesex University, London

BSc Information Technology & Business Information Systems – 1st Class Honours

September 2024 - June 2025

Aptech Learning, Enugu

Advanced Diploma in Software Engineering - Distinction

September 2022 – January 2024

TECHNICAL AND KEY SKILLS:

- **Languages & Frameworks:** React, Next.js, Typescript, Vanilla JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, Tailwind CSS
- **Tools & Practices:** Git/GitHub, GitHub Actions (CI/CD), REST APIs, GraphQL, Jest, Cypress, Agile, Accessibility (WCAG), UI/UX Prototyping, TDD
- **Soft:** Independent Delivery, Communication, Team Collaboration, Problem-solving, Adaptability, Time Management, Code Reviews

EXPERIENCE:

Global Health Reform Initiative (Frontend Developer Volunteer)

November 2025 – Present

- Built GHRI's healthcare platform frontend using Next.js, enabling patients in underserved regions to connect seamlessly with healthcare practitioners across web and mobile.
- Integrated secure APIs and reusable components, improving reliability and maintainability ahead of launch.
- Supported the rollout of features enabling users to book consultations and allowing doctors to manage appointments and patient dashboards — helping GHRI move toward launching a fully functional telehealth service.

Genesys Learnable (Frontend Developer Intern)

December 2024 – June 2025

- Worked on multiple frontend projects translating complex Figma designs into pixel-perfect, accessible interfaces, accelerating delivery and reducing design-to-development gaps by ~25%.
- Led development of individual and team frontend tasks, including reusable components, API integrations, and state logic, ensuring consistency and faster delivery across multiple team projects.
- Collaborated with designers and engineers in Agile sprints, reducing UI bugs and review cycles through clean code practices and proactive peer feedback.

Simbi Study App (Frontend Developer) – Team Project (MVP)

May 2025

- Built an AI study buddy with features like a study timer, chatbot interface, and session tracker using Grok AI API, Next.js, Typescript and Zustand, enhancing productivity for student users.
- Integrated secure API communication with Axios interceptors and implemented auth guards, ensuring data persistence and access control.
- Collaborated closely with backend engineers, product designers, PMs, and data analysts to deliver a responsive MVP aligned with user research and usability goals.

PROJECTS:

Adaptly (Software Engineer) – Google Chrome-AI Hackathon Entry

October 2025

- Developed an AI-driven summarization app that translates and explains foreign-language documents by letting users query the chatbot using Prompt and Translation Chrome APIs, improving accessibility for multilingual users.

Timbu Cloud Shop (React Developer) - Collaborator

July 2024

- Collaborated with a UI designer and developed a responsive e-commerce interface with React and Redux Toolkit, integrating dynamic cart features for seamless product browsing and checkout across devices.

Yienor Blog (React Developer) – Collaborator

January 2024

- Created a responsive blog platform using React, featuring intuitive navigation and an admin dashboard for efficient content management and publishing.

Currency Converter (Developer)

November 2023

- Built a lightweight currency exchange web app using vanilla JavaScript and a live rates API, enabling real-time conversion and interactive rate updates.

CERTIFICATIONS, TRAINING & COURSES

CS50: Introduction to Computer Science - Harvard University (edX)

Advanced Diploma in Software Engineering - Aptech

ALX Software Engineering Programme - ALX Africa

ADDITIONAL INFORMATION:

- **Interests:** Economics, content creation, cross-platform mobile apps, fintech UX, AI-driven productivity tools
- **Availability:** Ready to work, contribute and grow through hands-on experiences and mentorship.
