Activity Guide - Styling Elements with CSS

Level 2:

Type the **<u>single line of code</u>** that does the following things:

1) Makes the entire page blue

2) Positions images to the left of all the other elements

3) Makes the image corners rounded

Levels 4 and 5:

If the body selector says that the background color is purple, but the paragraph selector says the background color is yellow, what color will the background color of the paragraphs be? Why?

Level 7:

What does the **border-radius** property do? What happens if you increase the number of the border radius?

Level 8:

What does the **float** property do? How would it be different if it didn't have the **float** Property?
