

# Privacy Policy

**App Name:** Quotes Creator

Welcome to Quotes Creator. Your privacy is important to us. This Privacy Policy outlines how we handle data and protect your information when you use our Android app.

## 1. App Functionality

Quotes Creator allows users to explore a large collection of quotes across various categories. Users can:

- Browse and select inspirational, love, motivational, and life quotes.
- Customize the background of quotes with colors, gradients, and images.
- Create and save their own quotes using built-in design tools.
- Download and share personalized quote images with others.

## 2. Information We Collect

We collect limited data to improve app functionality and user experience:

- **Crash reports:** To help diagnose technical issues.
- **Anonymous usage statistics:** To understand how features are used.
- **Advertising identifiers:** Used by our ad partners for relevant ad delivery.

**Note:** We do *not* collect or store any of your custom quotes or background designs. All user-generated content remains on your device.

## 3. User-Generated Content

You are free to create your own quotes and customize their design within the app. These creations are stored locally on your device and are not uploaded to our servers.

If you choose to share your creations, it is done through your device's sharing tools (e.g., gallery or messaging apps), and we do not track or store any of this content.

## 4. How We Use the Information

The data we collect is used to:

- Improve performance and stability.
- Fix bugs or crashes reported automatically.
- Provide relevant, non-intrusive ads to support the app.

## **5. Data Retention**

We do not collect or store personal data or any of your custom quotes. Any data collected by third-party services (like crash reports) is subject to their retention policies.

## **6. Your Choices**

Users can control their experience and privacy by:

- Opting out of personalized ads in device settings.
- Disabling analytics tracking via Google settings.
- Clearing app data or uninstalling the app if desired.
- Reviewing permissions given to the app in Android settings.
