

# Defining Objectives

**Type of Trader:** I seem to be a momentum trader (21 yrs). I like to look for breakouts and ride trends. I tend to look on the big picture and bias based on the market environment

**Time taken on chart:** I will be intraday trading and long term investments cause i have 3 to 4 hrs each day and more than 10 hrs on the weekend. Most of the other time of the day I use it for working so I can sustain my living (i have no dependant).

**Risk profile:** i am risk tolerance, i don't like to risk much just 1% to 2% of my profile amount and grow my account over time

**Asset class:** i only tried paper trading on stocks for practices, i would like to trade underlying on stocks.

Thank you professor for everything you've taught me so far, God bless you.
