ANNOUNCING ZAIRN FOR FRÉMONT

The last couple years, America has witnessed the degradation of the political and legislative processes. Republican Presidents lord over Congress, while their cronies in the Senate and House work to obfuscate the majority. Eventually the Grand Old Party, content with the stymying of progress and the inactivity of federal government, retires into a lethargic stupor. Nothing short of personal attack is enough to awake the sleeping giants of the Republican Party.

The Democratic Party has come short of stopping the suddenly-powerful Republicans since the defeat of Darth Holo in the presidential election. Even here in Frémont, the Republicans have for the first time in decades taken the gubernatorial mansion.

But the expansion of the inert can continue for no longer. It is time for Frémont to free itself of the sleeping spell that will surely settle over her if the Republicans continue to rule over the state. It's time to reinstate the spirit of progress which pervaded Frémont in her earlier years, under brighter and stronger leadership.

But change has to start before the next gubernatorial election. It must commence now, in the Congress, where we can rebuke the Republicans in another statewide contest.

By sending former Senator Cypress Zairn to reclaim their old seat, we'll do just that.

Senator Zairn will be running to once again be a Senator from Frémont. Under their leadership, the Senate will once again be a bastion of activity and progress.

Stay tuned for further updates from the Zairn For Frémont Campaign Committee, including releases regarding two very expansive and monumental bills being introduced to Congress in the very near future.
