

**-The Idea:** Cynthia's custom TF item, producing a heavily muscular and curvaceous furry cowgirl.

## **-Holstaria [Item]**

**Location:** Dr. Lessau after speaking to Cynthia

**Cost:** Similar to Bovinium

**Store Description:** A bottle of Holstaria

**Tooltip Name:** Holstaria

**Tooltip Description:** This is a small bottle the size of an energy drink, labeled with the Steele Tech logo, along with a warning label about its prototype status. The drink contains an abundance of highly dense proteins and microsurgions used to produce transformation into a tall, muscular and curvaceous cowgirl.

## **Effects**

**Chosen at random, once per proc:**

**PC has non-black skin, lips, or nipples:**

Change skin, lips, and nipples to black.

**PC does not have fur:**

Grow brown, black, or black and white fur.

**PC has fur and PC's fur is a color other than brown, black, or black and white:**

Fur becomes brown, black, or black and white.

**PC has hair other than standard type:**

PC's hair becomes standard hair.

**PC has non-bovine legs or a different number of legs than two:**

PC's legs become two furred bovine legs.

**PC has non-human or non-furred human arms:**

PC gains furred human arms.

**PC has no tail:**

Grow a cow tail.

**PC has a non-cow tail:**

Change any tails to a single cow tail.

**PC has non-cow ears:**

PC gains cow ears.

**PC has cow ears and a non-bovine face:**

PC gains a bovine face.

**PC does not have horns:**

Grow a pair of one-inch cow horns.

**PC has non-cow horns:**

Change horns to a pair of one-inch cow horns.

**PC has cow horns less than 12 inches long:**

Grow horns 1-3 inches, then reduce horn length to 12 if over 12

**PC has no genitals:**

PC grows a black gabilani vagina with one level of pumping.

**PC has non-gabilani vagina, vagina is not black, or vagina is not pumped:**

PC's vaginas become one black gabilani vagina with one level of pumping.

**PC's vagina is pumped once:**

Pump vagina.

**PC has a cock:**

Shrink cock by 2-4 inches. Remove cock once below 3 inches, remove balls and grow one black pumped gabilani vagina if this leaves the PC with no genitals.

**PC is below 100 femininity:**

Increase femininity.

**Breasts below size 22:**

Increase bust size.

**Breasts above size 4, not lactating:**

Begin lactation, change milk to normal milk.

**Lactating:**

Increase lactation.

**Milk type not milk:**

Change to milk.

**Height below 96:**

Increase height.

**Tone below 100:**

Increase tone.

**Thickness below 100:**

Increase thickness.

**Hips below size 20:**

Increase hip size.

**Ass below size 16:**

Increase ass size.

**Ass above size 10 and tone above 70:**

Gain "Bubble Butt" perk.

**None of the above apply:**

Dud result.

## Consumption Text

You gulp down the thick, sticky drink, its milky flavor clinging to your throat. Soon your stomach grows warm, followed by the rest of your body as the microsurgeons set to work.

**Change skin, lips and nipples to black:**

The heat concentrates in your skin{ under your [pc.skinFurScalesNoun]}, seeming to scorch the color out of it. Even your lips and nipples darken as they turn pure black, providing you with an inhumanly uniform coloration {fur: that goes perfectly with your [pc.furColor] coat}{no fur: that you imagine is preparing your body for a fur coat}.

**Grow fur:**

{Scales: Your scales start to flake away as they heat up, revealing swathes of fresh smooth [pc.skinColor] skin beneath. You're left confused - wasn't this supposed to grow fur? - but a second wave of warmth follows just as you finish the thought.} Swathes of new {color} fur begin to fill out across your skin, soon spreading to cover you completely in the warm pelt. It's not quite thick enough to go without a heat belt on an ice world, but it should make you much more comfortable.

**Fur color:**

Your fur tingles as a drop of bovine {color} forms at your chest, flowing outward to cover your entire body in the new palette. <b>Your fur is now {color}.</b>

**Standardize hair type:**

Your [pc.hair] soon begins to molt; or perhaps melt is a better way to describe how it feels, wicking away under the heat of your scalp to leave your head bare. It doesn't stay that way for long, as fresh [pc.hairColor] locks grow in in short order, taking the heat with them. In time the sensation fully fades, leaving you with a new full head of hair.

**Change leg type:**

Your [pc.legs] quake under you, prompting you to hurry and sit down before you collapse. You watch as your lower body twists and morphs, forming into a pair of unguligrade legs each capped with a thick, powerful hoof. A layer of [pc.furColor] fur soon grows in over the skin, <b>leaving you with a decidedly bovine pair of legs.</b>

**Change arm type:**

Your arms feel sluggish as they warm up, making it a struggle to lift them. You watch as they shift into a form identical to a human's, but coated with a thin layer of [pc.furColor] fur.

**Grow cow tail:**

The heat concentrates just above your ass, at the base of your spine. Heat soon begets pressure that prompts you to groan, straining with muscles you didn't know you had. Each push makes the lump forming at your tailbone jut out a little further, until finally you feel a satisfying pop and look behind you to see the last of <b>your new long, ropy cow tail</b> slide out into place.

**Change existing tails to single cow tail:**

Your {tail feels // tails feel} hot, twisting and reshaping into a thin, ropy strand. A thin layer of fur grows over the new tail, expanding into a proper puff at the tip. <b>You now have a cow tail.</b>

**Change ear type to cow ears:**

Your ears migrate to the sides of your head and stretch like warm putty, moulding into <b>a pair of floppy cow ears</b>. A thin layer of fur soon completes the look.

**Get bovine face:**

Your face flushes with warmth, so much heat that it numbs all other sensations. You hardly feel a thing as your face pulls outward into a new muzzle to match your ears, <b>leaving you with a very minotaur-like face</b>.

**Gain cow horns:**

A pair of spots at the top of your head begin to bulge outward as they grow warm. The skin soon splits around a pair of one-inch cow horns{, just long enough to peek out from under your [pc.hair]}. They're pretty cute.

**Change horns to two one-inch cow horns:**

Your {horn starts // horns start} to pull inward, filling your head with an aching pressure that's relieved by the two new nubs forming on the top of your scalp. Soon enough you're sporting a new pair of cute little cow horns{, just long enough to peek out from under your [pc.hair]}.

**Grow cow horns by 1-3 inches if below 12, then reduce to 12 if above 12:**

Pressure builds in the base of your horns, prompting you to let out a shuddering moo as they push gradually outwards{original size 1: and curl as they do, changing from cute little cow nubs into proper steer horns}. {Not at cap after growth // at cap after growth: By the time the pressure fades, you've gotten {X} new inches of horn. // Finally they emerge at their full magnificent length, standing proudly as foot-long steer horns.}

**Gain black pumped gabilani vagina:**

The featureless mound between your thighs bulges outward ever so slightly as the warmth in your body concentrates there. Just below the surface you feel your insides shifting about, filling you with an odd feminine feeling. Finally your pubic mound creases sharply inward even as the surrounding lips grow bigger and puffier still, spreading apart of their own volition to reveal a black interior glistening with fresh feminine juices. At the touch of your fingers your puffed-up lips start sucking unbidden, laden with hidden muscles that give them perfect suction to go with their silky softness. <b>You're sporting a brand-new pussy.</b>

**Convert existing vaginas to one black pumped gabilani vagina:**

Heat pools between your legs, [pc.eachVagina] squirming as {it reshapes // they reshape} into an increasingly plump slit. Your pubic mound grows fat and puffy, coming to a sharp inward crease in the middle. Soon your new nether lips spread unbidden as new dick-sucking muscles set to work, revealing the glorious ebony within. <b>You now have a lewdly fat, steamy black cunt</b>.

**Double pump pussy:**

Your cunt engorges as heat floods your mons, pushing ever more lewdly outward. It's so fat that you can feel your thighs rubbing against the sides of your pussy, the crease getting so deep that you'll never be able to wear a swimsuit or even tight pants again without giving everyone around you a perfect view of your inhumanly puffy cameltoe.

**Shrink cock, remove, genderswap:**

Heat pools within [pc.eachCock], along with a feeling of slow inward suction. You look down to see your {cock is // cocks are} being drawn into your body, {shrinkage only: leaving you with {X} fewer inches by the time the heat fades}{remove cock: until finally disappearing outright}.

{New pussy: But you're not done yet. As the last bit of your male endowment vanishes, a new feminine feeling wells up in its place. Your pubic mound puffs outward with new fatness, coming to a sharp inward crease as if sporting tight cameltoe. You marvel as the puffy petals part to reveal a black interior glistening with fresh juices. <b>You've grown a pussy!</b>

**Increase femininity towards 100:**

Your face softens, {a little of its masculine edge melting away}{growing less angular and more feminine by the moment}{making you moan with delight at just how gorgeously girly you're getting}.

**Increase breast size towards 22:**

{Flat: You feel a budding pressure within your chest as it rounds outwards, forming into a pair of feminine bulges. }You let out a reflexive moo as your breasts expand, feeling light and fluffy as they settle at {X}-cups.

**Start lactation, minimum bust size 4:**

Your nipples feel oddly hot, a sensation that compels you to reach up and massage them. Soon your fingers are greeted with squirts of fresh cow's milk. <b>You've started lactating, albeit slowly.</b>

**Increase lactation:**

You let out a lusty moo as [pc.milkNoun] squirts from your nipples unbidden, your breasts growing ever more deliciously full.

**Change milk type to milk:**

You yelp as a sudden hot pressure builds in your chest, forcing your [pc.milkNoun] to start gushing out in massive sprays. You can only hold on to your breasts and watch as the [pc.milkColor] streams gradually turn pure white. Finally the spraying stops when the last of the old color is gone, leaving you with aching nipples that continue to leak small trickles of your new milk for several minutes afterward.

**Increase tallness towards 96:**

Your muscles feel tight, prompting you to stretch. As you do you feel your body expand as if decompressing a spring, raising your viewpoint noticeably higher off the ground. Your Codex confirms that you've gotten {X} inches taller.

**Increase tone towards 100:**

{Below // above 50: A bit of your softness seems to melt under the heat, letting the muscles underneath show through more clearly. // Heat pools in your muscles, making them surge and sharpen with new definition. You're looking more ripped by the second.}

**Increase thickness towards 100:**

You feel the need to roll your shoulders as they broaden together with your midsection, making you wider and more heavyset.

**Increase hip size towards 20:**

You briefly stumble as your stance widens, your hips {losing some of their former narrowness // starting to turn nice and hourglassy // getting so wide that you're starting to feel like a real breeding cow}.

#### **Increase ass size towards 16:**

Your ass thickens with new girth, stretching outward with each breath you take. {Above 12 and hard // soft: It feels nice, but a thought of it being soft and jiggy instead of hard like this flashes through your mind. That would be so much better, wouldn't it? // It's huge and fat and oh-so-slappable, just like it should be. Just the thought of getting spanked with an ass like this makes you let out an eager moo.}

#### **Gain Bubble Butt perk, requires at least 70 tone and ass above size 10:**

Your ass tightens, the muscles compacting inward over and over again until they settle in at a perfectly trim, tight shape. You're confused: isn't it supposed to make you bigger?

A moment later, bigger is exactly what you get. A new layer of fat forms over your ass and only your ass, ballooning outwards until your backside is just as huge as before, maybe even bigger. You reach back to give it an experimental spank and are rewarded with the absolute delight of a big, *<i>fat</i>* booty quaking under your palm. You flex your other arm, delighting in the contrast between your well-toned muscles and your newly soft backside.

**<b>Perk acquired: Bubble Butt! (Ass remains soft regardless of muscle tone.)</b>**

#### **Dud result:**

Heat courses through your frame, then eventually fades out. You must be as beefy as you can be.

## **New Perk**

### **Bubble Butt**

//Causes the PC's ass to be considered soft even when they have high muscle tone.

Text: Your ass is always soft, regardless of tone.
