

What's up AJ,

If you're tired of the same crap...just a different day... and can't live on your own terms, then you gotta accept the truth about why....

There's two months left in 2023, and the last thing you want is to enter 2024 living as you did this year... not to mention 2022, 2021, etc.

I'm Oriana, and I appreciate you joining the Young and Scrappy newsletter.

The persistent myth that you work all your life retire, and hope to live long enough to enjoy what you worked for simply isn't true.

Being wealthy and old is one thing, but being rich and young is even better.

AJ, money isn't just for paying bills—it's a necessary tool to help you get where you want to be, whether it's living comfortably today or living like there's no tomorrow.

If you're tired of checking the time on your phone every ten minutes anxiously waiting to go home , check out the link I attached, and I'll catch up with you later.

Till next time,

Oriana
