ULTIMATE: THE STORY OF THE TYRANT LIZARD OF RACCOON ISLAND.

By one singular person.

Based on a Jurassic World Evolution 2 Story.

Prologue: A new team of dinosaur experts go on and make a theme park of dinosaurs. Their latest attraction, the Tyrannosaur paddock, is under construction. After a few days, the paddock was constructed and finished…

Chapter 1: A New Beginning.

The park has no other choice but to make a new dinosaur. And when they did, the science team went erupt on their new creation: a new Tyrannosaurus rex embryo. They started to put the embryo in an egg. And what happened next shocked the science team.

Chapter 7: God Creates Dinosaurs, Destroys dinosaurs, Creates Man, Dinosaur Eat Man.

You wake up, wondering what happened during your work operations. Suddenly, the operations street gets ambushed by many dinosaurs, including Ultimate. You are wondering what to do, but one of the security guards try to aggravate the Rex. Instead, he gets eaten. Also, you get eaten as well. The containment crew has a plan to contain all dinosaurs for their new appearances in the new park, Jurassic World Raccoon Island. (Version 4.) The only problem was rustlers, who sabotage the operations, but mainly steal the dinosaurs. Luckily, we got the rustlers away from the operations. How? By destroying their illegal property. It turns out, they had a company of their own, which we sent an entire Indominus to the desert poacher camp and it wrecked everything! Anyways, back to (probably) third person omniscient. The Ultimate has been contained into a new enclosure, and the operators were happy. Except for a man named Prince. This man soon sabotaged a Jurassic Park but was killed by Dilophosaurs. After the celebration, the team started to transfer the dinosaurs to the Coast, the South Coast.

Chapter 8: The Coastline Research Station.

Ultimate was soon put in a demo version of his soon grand enclosure.
The aftermath of his reign was put into test at his end, but let's not look into that yet. After he was transported, he soon knew how dangerous one storm was, so when a storm happened and weakened the gate enough, he escaped and wrecked havoc for the researchers. It was a major problem, because he needed training. But soon enough, the researchers had made a new genetic modification, which they actually did a lot, but this time it was for training purposes. Now the company can train Ultimate the way Ultimate wants too, and has too. However, many of the dinosaurs Ultimate knew were missing from his habitat. The company decided to rise up their scores by starting the park building process. All dinosaurs were soon transferred to the Mid-South, including Ultimate.

Chapter 1: A New Beginning.

The park has no other choice but to make a new dinosaur. And when they did, the science team went erupt on their new creation: a new Tyrannosaurus rex embryo. They started to put the embryo in an egg. And what happened next shocked the science team.

Chapter 9: Welcome to Jurassic World (Part 1) The life.

Welcome to Jurassic World, the main headquarters for the company Raccoon Corporation. Our attractions will drive people out of their minds, or make people wonder, “How are they made?” Well, their genetic code usually consists of good DNA.
So would they think… the Cryolophosaurus (Cry-o-lof-o-sor-rus)is the most dangerous creature on the park. No wonder why the park was wrecked down. Anyways, the park received more than 4 million during March. After a little while, Ultimate’s enclosure got a training course, where the T.Rex runs like a kid in P.E. After many days, Ultimate got bored. He slept throughout days and hunted through nights. So bad for the guest, am I right? Anyways, the hunter has become the sleeper.

Chapter 10: Welcome to Jurassic World (Part 2) The Shutdown and the Showdown (AKA: The Longest Chapter in this Book.)

Welcome to Jurassic World, where our story continues, and where others came to a turn back 1 mile. At least no one was hurt throughout the incident. The park contacted the PARK APPROVAL EXPERTS (PAE) to have a ferry boat come to rescue all surviving guest, well all guest, because no one died. The raptors, Drone, Rentor, Sovet, and Tiger were hunting for the Cryolophosaurus. The Dinosaur Alliance (All dinosaurs except for Cryolophosaurus) Tortured the Cryolophosaurus, Queen Death, and guess who shoved the Cryolophosaurus into the Mosasaurus’s mouth, Ultimate! During the shutdown, the raptors were feeling like hunting in the power station. The raptors tried and tried to kill the survivors, they gave up after Raccoon shoved Sovet into the electrical conductor and got electrocuted. Though that happened, the raptors retried through the headquarters, but all they got were electrocution punishments from the broken computer wires. Anyways, the story of Ultimate didn’t end here. Ultimate went through his toughest battle against the Cryolophosaurus and what he may have said was to Queen Death, “Die you little piece of flesh!” After all dinosaurs started moving throughout the park, Ultimate started moving through the wild forest and mountains, and even got to see the volcano, Mount Raccoon.

Chapter 1: A New Beginning.

The park has no other choice but to make a new dinosaur. And when they did, the science team went erupt on their new creation: a new Tyrannosaurus rex embryo. They started to put the embryo in an egg. And what happened next shocked the science team.

While every other dinosaur, like armargasaurus, sauropelta, and camarasaurus all came back north, major ones like Brachiosaurus, Velociraptors, Ceratosaurus, and the Tyrannosaurus Rex, Ultimate, stayed in the Mid- South. As well as they can do, the volcano was about to erupt. If you read chapter 1 fully, you probably heard “erupt” before. But who will save them, well let us not worry about that and let’s focus in between the 2023 Mid South 1ST Incident and the 2ND Mid South Incident.

Chapter 11: The Wildlife of Raccoon Island.

The wildlife of Raccoon Island consists of green lush trees along with palm trees. There is also fresh water. However, North is a little harsher. The trees there resemble either the palm trees of the South or the taigas. The island is part of the Tropical Archipelago, near Las Cinco Muertes Archipelago, where Isla Nublar, or where Nublar once, lied. Other islands such as Conico Island are significantly near from Raccoon Island. Other islands like Isla Orca are near. Raccoon Island is the biggest island in the entire Archipelago. But since it was the biggest, it was also the one with the big volcano…

Chapter 12: The Rex and the Raptor.

In the wildlife of Raccoon Island, Ultimate, who was starting to notice a color change within his skin, met up with Drone, Rentor, Sovet, and Tiger. As well as Drone and Rentor’s old group mates, Triton and Endo. So far, we could call this a male carnivore meeting, but not all male carnivores came in. All was well until Indoraptor Lava came in, who was raised wild. Lava, or Magma (Just call the Indoraptor both these names) went on a wild rampage and started fighting Ultimate. Magma decided to fight the raptors too. However, the raptors won over Lava and Lava went back South. Even though the raptors teamed with Ultimate, Ultimate went East and not West like the raptors. Along the way East, Ultimate encountered a new beast with features alike…

Chapter 13: A New Beast.

ULTIMATE: THE STORY OF THE TYRANT LIZARD OF RACCOON ISLAND.

Chapter 1: A New Beginning.

The park has no other choice but to make a new dinosaur. And when they did, the science team went erupt on their new creation: a new Tyrannosaurus rex embryo. They started to put the embryo in an egg. And what happened next shocked the science team.

In the East of Raccoon Island, Ultimate encounters another Rex, whose name is Big Rex. Big starts the fight by chomping on Ultimate's neck, but Ultimate still has the big advantage. Ultimate then ***brutally*** bites on Big's neck and Big stays UNCONSCIOUS and lies down on the ground. Ultimate wins the fight and leaves but doesn't notice what happens next after death…

Chapter 14: The Rescue Operation. (Part 1)

Ultimate meets up with Drone, and only Drone. They communicate and see helicopters. They both wonder why, but they proceed to follow the helicopters, but not noticing how all other dinosaurs were following a vehicle that went by either land, water, or sky. Ultimate meets with the other dinosaurs, and sees the old headquarters. Ultimate and Drone recognize the helicopter's design. It was Raccoon Corporation. They were doing a rescue operation.

Chapter 15: The Rescue Operation. (Part 2)

Ultimate encounters the team, including me. I went to calm it down, and it did. It recognized the team and knew how we were only helping them survive one last time. The team was starting off by helping other dinosaurs survive in 4 separate enclosures: The main carnivore paddock, A.K.A The grand T.Rex Paddock. There was also the Ceratosaurus Paddock, the Gyrosphere valley, and the dangerous T.Rex enclosure, which held Big Rex and Challenger, a T.Rex from California. In the Main Carnivore paddock, Ultimate and the following were in a single paddock:

- Californian T. Rex, "The Rex."
- Drone
- Rentor
- Triton
- Endo
- Sovet
- Stripe
- Chris (Velociraptor)
- Jungy

The park has no other choice but to make a new dinosaur. And when they did, the science team went erupt on their new creation: a new Tyrannosaurus rex embryo. They started to put the embryo in an egg. And what happened next shocked the science team.

- Cantor
- Ultimate Indominus
- Indominus Rex Origin
- Carbon File the Indominus
- Indoraptor Lava
- Indoraptor Origin

Many stories were made here, so most of the story follows this setting of the story.

Chapter 17: Enough is Enough…

When Ultimate was in the enclosure, one dinosaur, Carbon File the Indominus, made way and killed Cantor. Carbon was then tranquilized Carbon File and everybody who saw it (Everybody = All organisms) called Carbon File a murderer, even the dinosaurs. The way they called that was how they roared.
The time Carbon waked up, he saw how much damage he did to the poor dinosaur, who was only a few days old, but was already big. After a while, Carbon also noticed that Ultimate and Origin had fought, but none were killed.

Chapter 18: A final goodbye to the group…

As time went on, he saw that one by one, the group had dying dinosaurs one by one. He saw his friend, Ultimate, die of old age before him. He also saw the rest of his friends die. The Velociraptors were next. He said goodbye to Stripe, Sovet, Endo, Triton, Rentor, and lastly, Drone. It was sad to see that his best friends died, but he was about to meet his end too.

Chapter 19: The Stand.

March 16, 2023. 1:30 PM.

Chapter 1: A New Beginning.

The park has no other choice but to make a new dinosaur. And when they did, the science team went erupt on their new creation: a new Tyrannosaurus rex embryo. They started to put the embryo in an egg. And what happened next shocked the science team.

Welcome to Raccoon Corporation, where the rest of our assets are gone, but one stands up. Ultimate, the Tyrannosaurus Rex, lives up to here. It is now standing in the hotels, which are being demolished. Please, leave the building now.

As Ultimate went to the valley he greatly stepped on, he suddenly realized what was going on. He felt a sickness, of dying inside, and felt very tired. He roared as he feared he would die. Eventually, the fear would become the reality.

Chapter 20: The Final End.

March 16: 2023. 3:00 PM

As I go up the helicopter, I see Ultimate. I, Raccoon, get down and observe the poor Rex, but it's too late. I had to get back to the helicopter. I said one last goodbye and put a secret observer around the dinosaur. Ultimate gave his final roar, and then…

he froze and lied down. He tried so hard and got so far, but in the end it doesn't even matter to him.

Epilogue: But in the End, it doesn't even matter.

Our story ends here, in the eruption. Ultimate's skeleton started rattling. The volcanic eruption melted Ultimate's bones and left almost no life. I actually snuck a piece of Ultimate's DNA. The only thing that was left was the headquarters building, which stood strong and announced the following: "Welcome to Jurassic World, where the Tyrant Lizard, Ultimate, stands up strong."
