

Academic Freedom at Stanford

[This petition was sent to the president of Stanford on April 13th, 2021]

The signatories of this letter are concerned about the state of academic freedom in American universities. Freedom of expression and open inquiry are vital to the search for truth, which is the core mission of the academic enterprise. To preserve the integrity of our mission, and to signal the importance of free speech in universities everywhere, we urge the president and board of trustees of Stanford to join the more than 80 other universities to publicly endorse the [University of Chicago statement on free expression](#), and to state that it is Stanford university policy.

Sincerely,

The undersigned

First name	Last name	Department	Date
