

# The Following. PLAN.

The Following is the name of the product.

-

I have been asked to produce an original short horror film that should last between 5-10 minutes. It also should have dialogue .

-

In my short horror film, there is a teenage girl who gets kidnapped on her way home due to the fact that her boyfriend did not want to drop her home.

-

The language that is used in the script is restricted. It is also very ,modern and contains 'slang' and some swear words. The reason for this is because it is set in 2017 and that is the common way that teenagers talk to each other and that is their 'lingo'.

-

The storyline of the film is that the girl gets kidnapped and no-one knows who kidnapped her.

-

The genre of my short film is horror.

-

The style I have chosen to use language that is used by school students because it is feasible due to the setting of the script and because of the target audience who would most likely speak or understand the language .

-

Based on the style of script being produced I will use slug lines so that the location and time of day is clear.

-

The style of script I chosen is single narrative stranded. I will put characters names and dialogue in the centre of the page while action will be written across the page in small paragraphs. Both the sluglines and the character's names will be written in capital letters.

-

The typeface is courier.

-

The target audience is aimed for the ages 12 and plus.
