## Avatar

- Jennie (27)
- The entrepreneur, runs one large makeup company.
- Likes to eat sandwiches after her exhausting day with her husband.
- Smart, pretty, and adorable woman
- Has brown slight black hair, good posture, high-end lifestyle (Chanel and Hera ambassador)
- While at work her apartment deals with equipment deterioration of water systems and lightning.
- She desires to have her home completely fixed and doesn't like to be in stress every evening.
- Her favorite hobbies are cooking and spending time on the weekends with her husband.

## Day in life

- She usually wakes up at 8. pm, because of the water system soaking into her bedsheets overnight.
- After fixing this routine problem, she hopes to go to the kitchen to cook breakfast for her husband.
- At 10. pm, Chanel, or Hera (depending on the day) request the 3-hour photo shooting with their new products.
- During a photo shoot, she worries about her home equipment every time, which puts her under immense pressure.
- When arriving back home, she finds herself surprised by a broken building system (custom block boiler out of service, warm water makes a small new sauna pond in her bedroom, power goes down every time she touches the switch- she must stay in dark till her husband arrives back)
- Afternoons are a disastrous part of her day. She often cries in her bedroom for fixing this equipment again, sometimes she desperately tries to call somebody to fix it, but they are always busy working. She can't do her work effectively in her company as a CEO.
- In the late evenings when her husband comes, he needs to comfort her a lot and repair all the issues all over again.
- They eat their dinner together with high stress at 9. pm.
- Both go to sleep at 10. pm however the water only gives a cold one while showering and brushing her teeth.
- She often coughs every week, which makes her emotionally and physically weaker.
- Her bedsheets cannot be cleaned in the washing machine, because of the connection to the building system.

## Roadblocks

- She feels stressed about her water system, especially the heating one while being at endorsement.
- She experiences huge stress from not fixing her equipment correctly.
- Her sleep is ruined cause of a rapid ponding of her bedsheets.
- On disastrous afternoons while she needs to focus on her brand, she instead tries desperately to fix all her equipment and cries loudly without any help.
- Her switches are bugged, they are fully functional in the evenings.
- Coughs every time due to cold water in the evenings.
- Her bedsheets are smelling from the contact with water.

## Dream State

- Have warm water available nonstop, so she can reward herself with a nice bathroom sauna.
- Enjoy her afternoons occasionally. Make her career progress.
- Get rid of the stress of house distribution systems.
- Give her husband a peaceful evening comeback.
- Be in perfect health condition.
- Have her bedsheets cleaned up in her washing machine.
- Sleep like a log every night.

SL: Wipe out all plumbing issues in under 30 Days!

Haven't you suffered from repairing the water systems for whole afternoons?

But do water systems get fixed correctly, so you can enjoy peaceful evenings sooner?

Because you are tired after your endorsements, your focus always likes to shift away to fixing water systems all at once.

The truth is... many households are equipped with modern plumbing technology.

That gives them sauna-like water, stable living conditions, and modern heating in their household.

If you're willing to see the newest plumbing enhancement?

## PAS

SL: Have you ever woken up to find a flood in your home due to a malfunctioning distribution system?

Researchers found out that more THAN 70% of household distribution systems are on the verge of collapsing.

Imagine fixing a water system in the afternoons and if they were extraordinarily peaceful and simple you could not even connect any important parts correctly.

But connecting water sections together got more complex within the last 2 years!

Why are you exhausting yourself in the afternoons to repair plumbing systems all over again?

The times when you should've been spending your evenings in rest, instead you decided to fix another water system part incorrectly?

Every time you've tried to fix the system...

Has scrambled the whole house distribution system, giving you an everyday afternoon sorrow all alone in your house.

In fact, modern houses were recently switching from a traditional system to an eco-house water distribution for purpose of avoiding deteriorating problems...

While being approved by top-known experts within a field.

The eco-house programs enabled owners to willingly set their distribution preferences and avoid water leaking and achieve a stable energy supply.

Never let plumbing problems control your everyday life anymore.

SL: Is your heating system leaking up your whole ceiling construction?

Are you tired of dealing with leaky heating systems that cause headaches and expensive repairs?

I know firsthand how frustrating it can be to have a heating system that causes more harm than good.

What would you do? I'll tell you what I did...

I bought a large house in Westwood years ago.

However, checking the sink and all switches I found out something doesn't play here.

I looked from distribution pathways to the electrical room itself.

And as I slowly realized, the whole plumbing system had deteriorated due to poor healthcare in every section.

Feeling disappointed and financially drained, I took matters into my own hands and began repairing the pipelines and electricity myself, but it wasn't an easy task.

My hands always ended in a bloodbath when I touched the generator or boiler.

Suddenly our apartment tenant expired, and we decided to move all in.

I needed one QUICKEST piece of magic to make my house presentable to my family.

Found the first service rolled up on Google and called them within seconds.

And in 2 months of intense work, I couldn't believe the result produced in a week!

My house got rid of major problems that enabled me to activate turning lights automatically while waking up.

But I knew that all the problems that I faced were completely gone without leaving any single footprint.

I couldn't have asked more than this...

Is your water system a ticking time bomb waiting to explode?

Struggling to connect two pipelines repeatedly must be a challenge, mustn't it?

It's the same as building a bridge between home equipment and a water system.

Not to mention that when it's done incorrectly, a single mistake could cause your home to be flooded with water and thousands of dollars in damages.

However, many people are getting headaches when they must fix it with their inexperienced hands.

You don't want to become one of them, do you?

The boiler bomb is ticking and until you find a perfect reliable expert, it will remain untouched.

So, let's clean up all the problems in your household.
