- 🌐 [firstname] talk to your leads in any language (Callsi mid-launch deal)

Mail

Hi [firstname],

How many opportunities slip away because calls aren't answered fast enough—or worse, not at all?

I have emailed you since the launch of Callsi and I made you know it is available for a one time offer.

Most early adopters are already sharing positive reviews about Callsi— see below:

Monica: Callsi saved me from losing \$2500 deal just few days ago, because the client called at 12pm which was 6pm the client's time"

Imagine your client calling at that exact moment when you're fast asleep too....That could be a loss of opportunity..Yeah a deal that would have been yours will just sip away.

With Callsi, that problem disappears.

Callsi gives you your own AI-powered phone agent that:

- ✅ Handle both inbound and outbound calls automatically.
- ✅ Qualify leads, answer questions, and follow up instantly.
- ✅ Book appointments straight into Google Calendar.
- ✅ Work 24/7 in multiple languages with natural, human-like voices.

✔ Send you transcripts and email notifications so you never miss key details.

Businesses are already using Callsi to replace expensive call centers and keep the phone working around the clock.

And right now, during the mid-launch window, you can still secure Callsi at the special early-bird pricing before it goes up.
