Discussion Questions:

- If you were a student, what would you hope to get out of visiting the Library and Writing Center? What are some barriers that students might face when trying to access resources in the Library and/or the Writing Center?
- From the reading(s), what collaborative ideas do you think we could apply to our partnership?
- How can we integrate the Library and Writing Center services better?
- How can we in Libraries and Academic Support Centers help students integrate their writing and research more holistically?
 - How can we help students understand that writing and research is an iterative process?
