

14-04-2025 Meeting Agenda and Notes

Round-table participants

Add yourself to the list at the bottom of the document if you want to talk about what you're working on during the round-table session. (So I don't have to copy it every time; make your name bold, and add a colon (:) that is not bold after your name...)

Absent:

- Ivan (vacation)

Meeting Meta

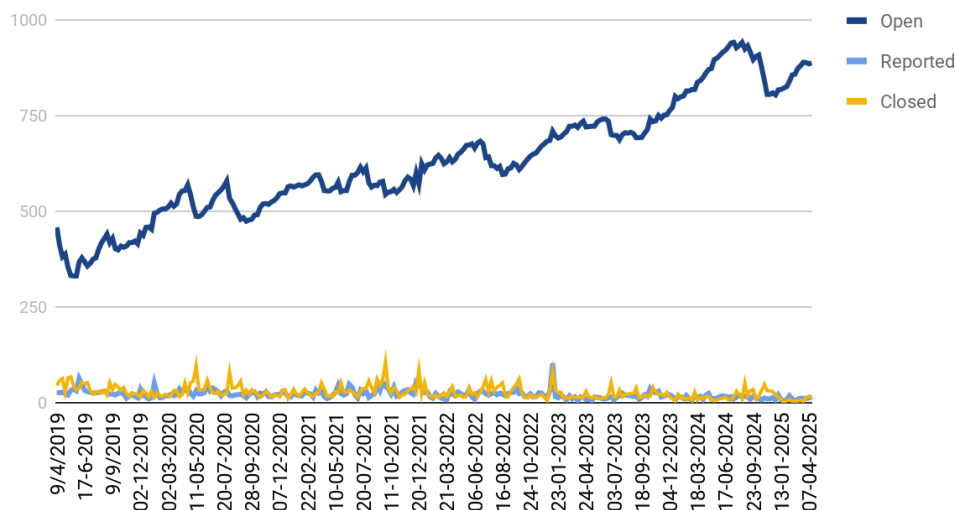

Rotation: [Wolthera, Emmet, Halla]

Today's Lead: Emmet

Statistics

887 +16 -14 (885 +12 -17)

Bugs

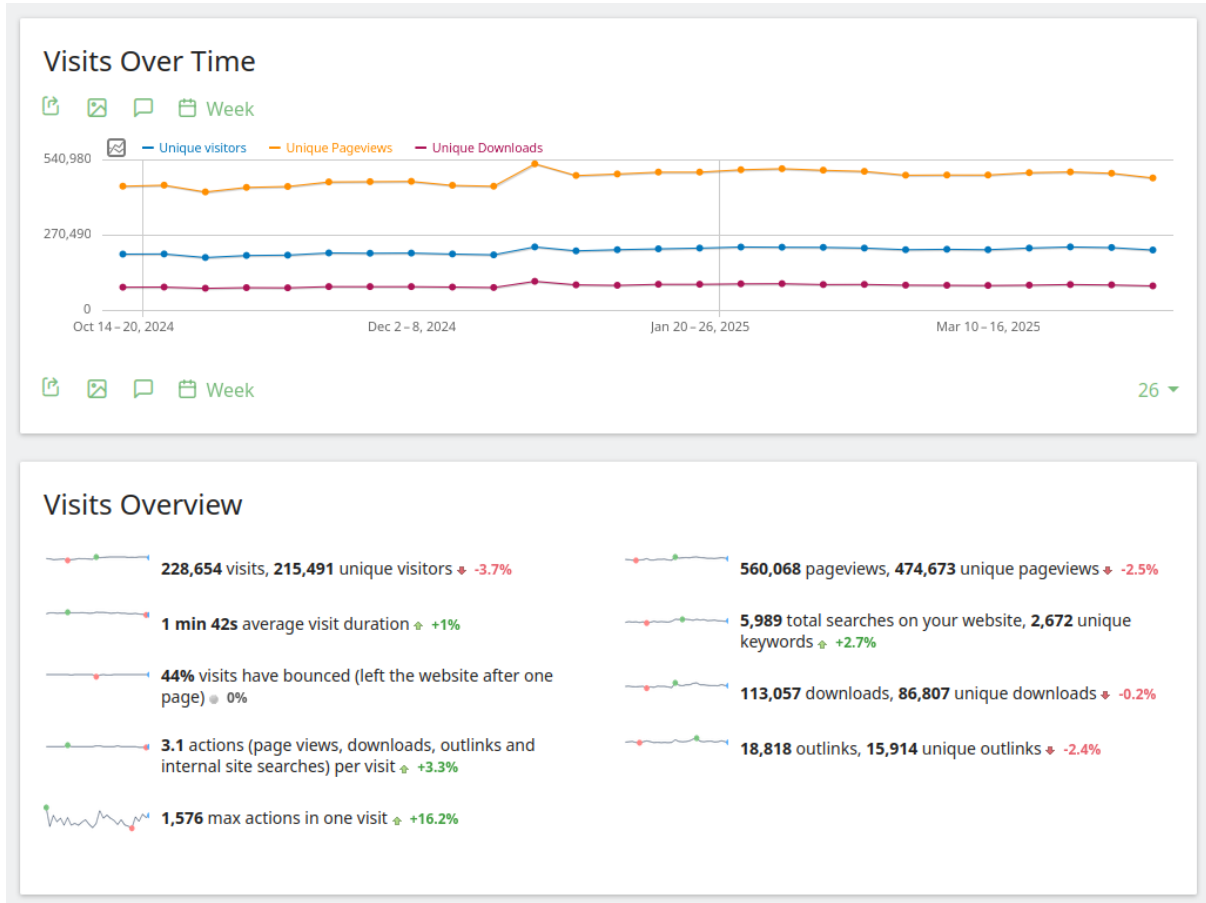

Commits in the past week

- Excluding merges, **11 authors** have pushed **50 commits** to master and **57 commits** to all branches. On master, **169 files** have changed and there have been [35,862 additions](#) and [16,519 deletions](#).

- Excluding merges, **9 authors** have pushed **57 commits** to master and **58 commits** to all branches. On master, **279 files** have changed and there have been **56,583 additions and 55,726 deletions**.

Web:

(since 16-12)

- Recurring donations: **€2717** in the past month
- Fund.krita.org: **249** subscribers (244)
- Krita-artists.org: Pageviews last week - **277k**
 - Active Users Last week - 1.0k
 - Total Posts Last Week - 1.5k
 - Sign-ups - 24.2k
- [Mastodon](#): **8.5k**
- [Peertube](#): **903**
- <https://subredditstats.com/r/krita>

Code Stuff

Regressions and Bugs

- 24 [bugs marked as Regression](#) (+1)
- 1 [bugs marked release blocker](#). (~)

- Wolthera: caused by the icc-color parsing for 5.0, as that parses to kocolor and then to qcolor.

Updating Dependencies

Task: <https://phabricator.kde.org/T16430>

Qt6

-

Merge Requests

- https://invent.kde.org/graphics/krita/-/merge_requests/2260
 - merged
- https://invent.kde.org/graphics/krita/-/merge_requests/2368 -- Weirdness with resource database.
 - Dmitry fixed this, Wolthera reports it works
 - Just needs unit tests, otherwise ready.

Manual

- [halla] pipeline kick-off - done

Website

-

Release

Release procedure for stable releases:

- We release every other month
- Four weeks before we release, we close the merge window: only regression fixes are allowed
- Four weeks before the release, we will release a "beta".
- When we tag the final release, the merge window opens again

Releases:

Schedule

- Next release...

- to be planned after we're done with the Qt6 port
 - We need at least a month of intense bug fixing for 5.2.10 to be useful
- For the 5.3 release, we should consider requesting/coordinating another Steam Daily Deal -- our last one was in June last year.

GSoC

- One proposal:
https://docs.google.com/document/d/16oKsdCNNy5SXyNLD7yJSV_hw9_9-9DehEwkY9nIQaBg/edit?tab=t.0

Youtube

- [halla] We need to update our peertube channel with new videos:
<https://share.tube/c/44f2aa1f-1d21-4fa8-bf5d-21a1eef4875a/videos?s=1>
- > <https://tube.kockatoo.org/c/kritaorgpainting/videos>
 - actually, we use kde's peertube now, and that's handled by paul brown
 - We should check if we can forward, or else delete the account

Roundtable

- **Halla:** I worked on the floss.fund paperwork, as well as a lot of other admin stuff, did some bug triaging (or rather, closing obviously invalid bugs), finished the palette editor patch and backported it to 5.2 and fixed the kocolorset test.
- **Wolthera:** Last week I overhauled the text decorations and vertical line height metrics. I am now more or less done with all the font-metrics related things. Next up is linebreaking options. I led gsoc mentor meeting. Tested dmitry's database MR.
- **Emmet:** For me, taxes took a considerable amount of time this week. Other than that though, we had that GSoC meeting and I spent some time trying to make my latest custom undo command properly mergeable (though it's still not working yet for some reason I have to get to the bottom of).
- **Dmitry:**
 - I mostly worked on Wolthera's MR for metadata optimization, so in the end I
 - optimized metadata fetching by adding an index and limiting the scope of fetched metadata to one key
 - fixed a lot of bugs in displaying "broken resource" icon for the presets which have any dependencies missing
 - currently I work on updating ffmpeg to version 7
- **Tiar:** I did nearly nothing last week. I attended the GSOC meeting, and sent an email to Intel with the benchmarking script, and I wrote to Ramon on Discord but didn't get an answer so I wanted to talk with him here, but he's not here. We need a power user to use the FSC plugin and make either a video or a blog post or something like that. I'm gonna make a KA post
