What Cannabis Products Are Available?

Bud Bar Cannabis Weed Dispensary Crowfoot carries a rotating selection of legal cannabis products supplied through regulated channels. Current brands, package sizes, product formats, and prices may change based on inventory and supplier availability.

Cannabis Flower

The Cannabis Flower category may include dried cannabis from different licensed producers in several package sizes and cannabinoid profiles. Customers can compare products based on package weight, listed THC and CBD content, producer information, terpene details where available, and price.

Some products may be described as premium cannabis based on cultivation, processing, packaging, brand positioning, or price. These descriptions do not guarantee a particular experience because individual responses to cannabis can vary.

Pre-Rolls

Pre-rolls may include single units, multi-packs, strain-specific selections, mixed packs, and infused options where available. They provide a prepared format for adults who prefer not to grind and roll dried flower.

Customers should review the package quantity, ingredients, producer information, and listed cannabinoid content before purchasing.

THC Gummies

THC gummies are regulated cannabis edibles sold in compliant packaging with labelled cannabinoid information. Customers should read the product label carefully, follow the serving directions, and avoid consuming additional servings too quickly.

Edibles may take longer to produce noticeable effects than inhaled cannabis and may remain active longer. Products must be stored securely away from children and pets.

CBD Gummies

CBD gummies may be available as part of the store's regulated CBD selection. CBD products are still cannabis products and may be sold only to adults who meet Alberta's legal purchasing requirements.

Customers considering CBD gummies for a health-related purpose should consult an appropriate healthcare professional rather than relying on retail marketing claims.

Vape Cartridges and Vape Pens

The Vape Products category may include vape cartridges, disposable vape pens, and compatible devices from licensed producers. Customers should confirm device compatibility before purchasing a cartridge.

Only regulated vape products should be used. Unlicensed or modified cartridges may not meet the same testing, manufacturing, or labelling requirements.

Live Resin

Live resin may be available in concentrate or vape formats depending on current inventory. Customers should review the package for listed cannabinoid content, product type, producer details, and handling instructions.

Because concentrates may contain higher cannabinoid levels than dried flower, careful label review is important.

BUD BAR

Bubble Hash Rosin

Bubble hash rosin may be offered when available from licensed producers. This concentrate format should be handled and stored according to the package directions.

Staff can explain factual product information such as package size, listed THC and CBD content, and storage guidance.

Live Bubble Hash

Live bubble hash may be available as part of the legal concentrates selection. Current availability depends on inventory and supplier distribution.

Customers should compare the label information and ask staff about product format or storage when needed.

Liquid Diamond Infused Concentrates

Liquid Diamond Infused Concentrates may be available in approved formats where supplied by licensed producers. Customers should carefully review ingredients, cannabinoid levels, product size, and usage instructions.

Product names and formats can vary, so the current online or in-store menu is the best source for availability.

Cannabis Beverages

Cannabis beverages may include sparkling drinks, teas, shots, or other regulated formats. Product flavours, cannabinoid content, serving information, and package sizes differ by brand.

Adults should follow the label directions, avoid combining cannabis with alcohol, and never drive while impaired.

CBD Oil

CBD oil may be available in different concentrations, ratios, and package sizes. Customers should read the label carefully and use the product only as directed.

CBD oil should not be promoted as a cure or treatment for any medical condition. Customers seeking health-related guidance should consult an appropriate healthcare professional.
