

Hazard Management Register

- Identify all hazards on the property
- Classify the likelihood and significance of the hazard. A significant hazard can cause serious harm, including death, amputation, fractures, serious burns, repeat or exposure injury/illness.
- Identify if the hazard can be mitigated, isolated or eliminated.
- Outline any preventative action, training or information required to manage the risk.
- Review each hazard regularly and ensure it is being well managed. Update the register when risks have been reviewed, new equipment is purchased, process change, or new risks are identified.

Eliminate (E) Remove the hazard from the workplace, e.g. hang hose in the pit to eliminate trip hazard	Isolate (I) Prevent people coming into contact with the hazard, e.g. fencing off hazardous areas	Minimise (M) Reduce the risk (e.g. training, process change) minimise exposure, use PPE
---	---	--

Hazard Identified	Likelihood Rating	Hazard (H) Significant Hazard (S)	Eliminate Isolate or Minimise	Potential Harm	Injury Prevention Action	Training or information required to manage the risk	Date of Review
Vehicles							
Two Wheeler	High	S	M	Fatality, Concussion, broken bones, permanent disability	Helmets Identified risk areas on farm Maintenance completed by Honda Wash once a week Sturdy Footwear 30km/h (slower depending on conditions)	Rider competency test Explain pivot ruts and pipes Shown steep paddocks after 3 months Maintenance checks	

Four-Wheeler (ATV)	High	H	M	Fatality, Concussion, broken bones, permanent disability	Helmets Identified risk areas on farm Maintenance completed by Honda Roll Protection Wash once a week Sturdy Footwear 30km/h (slower depending on conditions)	Rider competency test Shown steep paddocks after 3 months Maintenance checks	
Side by Side	High	S	M	Fatality, Concussion, broken bones, permanent disability	Helmets Seatbelts 30km/h (slower depending on conditions)	Intro/competency test Maintenance carried out by Can-Am or Honda	
Hilux	Low-Medium	H	M	Fatality, Concussion, broken bones, permanent disability	Seatbelts 4WD on farm	Drivers Licence	
Tractor	High	S	M	Fatality, Concussion, broken bones, permanent disability	Seatbelt Sturdy Footwear Maintenance carried out by D&E	Intro to tractor 'Tractor Policy' Trough hazard map for PKE Experience before back lane Maintenance checks	
Digger	High	S	M	Fatality, Concussion, broken bones, permanent disability	Seatbelt Sturdy Footwear Maintenance carried out by Hyundai	Team training around digger specific to each job Maintenance Checks	

Topper Mower Grubber/Maxi Roller Wagon/Flat Green Trailer PKE	High	S	M	Fatality, Concussion, broken bones, permanent disability	Sturdy footwear	Intro/competency test Farm Policy Shown steep paddocks/no go zones with trailers	
Grab Soft Hands Sprayer Auger Quick Hitch Hip Lifters	High	S	M	Fatality, Concussion, broken bones, permanent disability	Use best practice when working with implements Seatbelt Maintenance carried out by D&E	Intro/competency test Farm Policy	
Calf Trailer 400L Sprayer Pods	High	S	M	Fatality, Concussion, broken bones, permanent disability	Always park on level ground Sturdy Footwear Appropriate PPE or safety gear – spray masks, eye wear, gloves Helmets	Intro/competence test Farm Policy	

Slips, Trips, Falls

Trips	High	H	M	Sprains, broken bones, concussion	Traction on boots Tidy workplace (No clutter) Waterblast shed regularly	Talk about issue areas	
Hoses	High	H	M	Sprains, broken bones, concussion	Tidy workplace (No clutter) Move hoses aside	Talk about issue areas	
Ice	High	H	M	Sprains, broken bones, concussion	Traction on boots		

Livestock

Yards	High	S	M	Sprains, broken bones, crushed, concussion	Keep your distance Be aware of surroundings and EXIT route Keep out of yards where possible	Safe Animal Practice Induction	
Lame Crush	High	S	M	Sprains, broken bones, concussion	Keep your distance Be aware of surroundings and EXIT route Keep out of yards where possible Keeps hands free of rails Remove handle and release ratchet Rope back leg when trimming front Release head bale before opening gate	Safe Animal Practice Induction	
Treatments on Platform	High	S	M	Sprains, broken bones, concussion	Keep your distance Treat on Vet Stand Ask for assistance if needs	Safe Animal Practice Induction	
Aggravated or isolated Animals	High	S	M	Sprains, broken bones, concussion	Keep your distance Let out to paddock if stroppy Ask for assistance if needed Be aware of surroundings and EXIT route Keep out of yards where possible	Safe Animal Practice Induction	
Cows on Platform	High	S	M	Sprains, broken bones, concussion	Keep your distance Be aware of surroundings and EXIT route Keep hands off kick rail Stand directly behind cows Ask for help if	Safe Animal Practice Induction	

Shed Chemicals	High	S	M	Respiratory Issues, Burns, Skin Issues/Reactions	PPE Gear used at all times Take note of weather conditions Wash hands before eating	Use Post Milking Checks and Shed Wash Procedure Review Safety Data Sheets on Brookstead website First Aid Kit/Eye Wash station accessible	
Weed Chemicals	High	S	M	Respiratory Issues, Burns, Skin Issues/Reactions	PPE Gear used at all times Take note of weather conditions Wash hands before eating	Use Farm Spraying Procedure Review Safety Data Sheets on Brookstead website First Aid Kit/Eye Wash station accessible	
Fertiliser	High	S	M	Respiratory Issues, Burns, Skin Issues/Reactions	PPE Gear used at all times Take note of weather conditions Wash hands before eating	Review Safety Data Sheets on Brookstead website First Aid Kit/Eye Wash station accessible	
People							
Lifting	High	S	M	Fatality, Concussion, broken bones, permanent disability	Follow good lifting practice Work in a team/Rotate Use equipment properly	Induction - Good lifting practice Lift Calves with legs not back Rotate lifting activities	
Effluent Pond	High	S	M	Fatality, Concussion, broken bones, permanent disability	Always reverse, keep aware of your surroundings Wear appropriate PPE gear	Safe vehicle practice Induction on hazard areas Safe use of chemicals if any
