

Please post your name ideas here:

- Sanity - as in you're trying to make a sane, readable language
- Reevolution - (Pronounced ree-volution) Re-evolution of the web (I like this one).
- OOmph (not sure I like this one but the two 'O's represent "object oriented" - yeah, it's lame)
- Looking Glass (no idea where I got that from :P)
- WaterWolf - you know, just to troll Firefox :D (lol)

Okay, I'm tentatively going with Reevolution for now.
