

A Difficult Update About Jebelion

Hiy'all. We need to talk about something difficult regarding the project.

Astact and I have been working on VS Jeb since 2021, which evolved into FT Jeb and later was cancelled in favor of Jebelion, which featured all the same characters but told a different story. It's hard to pinpoint when exactly Jebelion started development, but its name was first mentioned in July 2023. Some time after that, the mod began development. It was quite slow because the co-owner and artist, Astact, no longer had as much free time as he used to, but it was steady. Sprite and concept production went on until July 17 2024, when he unfortunately passed away.

Ever since, it's been difficult to do anything. Initially, I announced that the production of Jebelion would be public now, meaning anyone would be able to submit their creations to be used in the project as official assets. Not much came out of it, and that's when I realized that most of the responsibility lays on my shoulders now.

Most of you reading this likely already think nothing will ever come out of it, but I am not giving up just yet. The development has been paused for a while because I wasn't ready, and it does really seem like a huge undertaking. Think of all the things that need to be done and the quality standards I want them to meet. But despite all of that, the day I am ready is closer than ever.

Now that we're done with the introduction, let's talk about the difficult update. Jebelion will feature 16 difficulties:

Watch-And-Learn, Peaceful, Too Easy, Easy, Simple, Relaxed, Normal, Tuna Can, Intermediate, Hard, Seething, Purgatory, Normal Hell, Fuck You, Jebus Christ! and JEBELION.

Yeah that's the difficult update. It's called that because it adds more difficulties.

What is Lorem Ipsum?

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

Whoops copied the wrong wall of text :"/
