

Poolz Opens Whitelisting for Rocket Vault IDO

Poolz recently announced the selection of Rocket Vault to conduct its IDO on its platform. Today, we announce that Poolz has opened the whitelisting for Rocket Vault's \$RVF IDO on Poolz.

To be eligible for getting an allocation during \$RVF IDO on Poolz, the investors must fulfill the whitelisting requirements. We have explained below the whitelisting requirements:

How Will IDO Whitelisting Work?

You will have to fulfill the criteria outlined below to be eligible for whitelisting for the \$RVF IDO on Poolz:

- Stake your POOLZ tokens on the [staking page](#)
- Participate in the tasks model described below:

To be fully eligible for \$RVF IDO whitelist, please make sure you

1. Follow [Poolz](#) on Twitter
2. Follow [Rocket Vault](#) on Twitter
3. Retweet the pinned tweet on the Poolz & Rocket Vault's Twitter account along with a quote and tag 2 friends.

Make sure to include cashtags \$POOLZ and \$RVF.

Link to pinned tweet:

4. Join [Rocket Vault's Telegram group](#)
5. Fill the whitelist form [here](#)
6. \$RVF IDO [staking page](#) link

We are really optimistic about Rocket Vault and we look forward to your participation in the whitelisting and \$RVF IDO.

About Rocket Vault

Rocket Vault is the first-ever Vault project that offers the best APY in stable coins. Their proprietary strategies are consistently able to generate 100+% APY**. The project achieves this by using advanced AI & ML algorithms. The platform automatically identifies the best performing pools and invests in them while avoiding risky pools.

To be up to date with the project:
