

Ideas for the project

- **(our proposals for the project**
 - create a blog : posting on the blog instructions games and math used in work with children and creating a photo gallery of the lessons,
 - Introduce ourselves(-What's your name? - Where are you from?- Where do you live?What are your interests? ...)
 - Introduce our schools
- Introduce our students. Each student says something about himself.
- show in the map
- write school addresses
 - Creating a LOGO of this project

the use (check) in their work selected games and posted by other partners and creating a photo gallery of the conducted lessons,

We can use puzzles crossroads scramble words or traditional games to learn maths. We can also write poems and songs for numbers addition or subtractions, a fairy tale <the europe land with numbers>

We can create our own board games using big papers and organize the meeting with students and their parents.

Students create quizzes and surveys as well as math problems for their partners

preparation of project evaluation.

- We can prepare the math game instructions.
- First, I ask my students how they like to play a game. Then we design together on the draft. We also put together the rules of the game. We play both and learn by having fun.
