Free Response Feedback

I like... I like the pictures of the cats, especially the third one with the really big eyes. (I WOULD DEFINITELY ADOPT IT!!!)

I wish... I wish there was more information about taking care of a cat, because you also have to take it to the vet.

What if... What if you used some different headers to make the take care of a cat page have sections for different things you have to do.
Creator’s Reflection

1. What piece of feedback was most helpful to you? Why?

I like the idea of helping people take care of the cat more with different sections. I want to put more stuff on that page, and the headers will make the sections work better.

2. What piece of feedback surprised you the most? Why?

I was surprised that they liked the third cat the best, because my friends said the one on the front page was the cutest.

3. Based on feedback, what changes will you make to your website?

I will add more information about caring for the cat. Also, I think I will find some more pictures so that every page has a picture.
