

## ENSATS Virtual College Fair

The Essex North Shore Agricultural and Technical School Guidance Department is excited to present our very first Virtual College Fair. College Fairs can greatly assist students and families with the college search process by providing opportunities for students and families to be exposed to many colleges and universities at a time. The colleges and universities represented in our Virtual College Fair are schools that ENSATS students typically apply to. These schools offer majors and programs and credentials (certificates and degrees) that often continue and complement the career pathways experiences ENSATS students have already committed to during their CTE program enrollment. In fact, many colleges and universities listed also afford ENSATS students the opportunity to access articulated college credits based on successful CTE course completion during their ENSATS CTE program enrollment as well.

ENSATS students and families can visit the **ENSATS Virtual College Fair** at any time by clicking on this invitation:

### [ENSATS Virtual College Fair Invitation](#)

During your visit, students and families can access:

**1) Guided Tutorials introducing each College or University website hosted by an ENSATS School Counselor (LEFT COLUMN):**

The ENSATS school counselors have developed guided tutorials for each college or university to assist students and families with navigating each college or universities' website. Click on any of these tutorials under the left column header of the Virtual College Fair Invitation: **"Guided Tutorials by ENSATS"**

**2) College and University Website Links (RIGHT COLUMN):**

After visiting the ENSATS School Counselor guided tutorials, students and families can then link directly to college or university websites. Click on the corresponding school link under the RIGHT column header of the Virtual College Fair Invitation: **"The College and University Website."**

We hope you find this information helpful during your post secondary planning process. As a reminder, students and families are encouraged to review ENSATS post secondary planning video series in student and guardian [Naviance](#) accounts. This video assistance library includes resources for beginning and completing college applications, financial aid considerations and more. Naviance also affords students and families opportunities to research colleges and careers, as well as organize the college application process (see top tab: Colleges or Careers in your Naviance account).

Feel free to email us to request additional assistance with navigating the post secondary planning process as well.
