Hi Sam,

In your How to Make FM DONK BASS video, I like how you said to put the randomness on 0 for plucky sounds to help give the pluck at the beginning. Very informative video for your audience who want to make Skillex's beats.

While looking for marketing mistakes businesses make through; captions, titles, and social media…

Your channel was recommended after searching…

I noticed that your channel is missing out on a huge amount of potential customers for your modern mix academy.

The content you post is entertaining, However, an improved format of your youtube & Instagram captions could be changed to increase engagement with your content and products.

I went ahead and implemented a few text-based strategies to help you…

1. Boost your product's click rate,
2. Engage with your audience,

3. And increase the **emotional** impact you have on your audience.

I implemented this strategy because these issues were common among businesses like yours & you have the potential to 10X the number of leads your product gets.

Would you like to see the solution?

Send me a quick reply, and I will send it over

Ryan Ho.
