

Exercise 04 Adapting to Breakpoints

How does your content adapt to changing environments? What are the changes your content goes through to adapt to its environment? What are the restrictions it faces in each environment? What are the freedoms in each environment?

What is your content? And how does it change? Does it populate/grow when there is more space? Does it condense/retract/hide when there is less space?

Tell a story about your content and how it adapts to its different environments.

Instructions:

1. Download the [starter kit](#).
2. Follow the tutorial & add relevant lines of code as we go along.
3. Design 3 different states for your webpage – desktop, tablet, and mobile.
4. Be sure to link this exercise to your class website.

3 different states

1. Mobile
2. Tablet
3. Desktop
