

Gel Electrophoresis Simulation Reflection

1. After completing this virtual simulation, what stood out the most?
2. Were there any parts of the simulation that you struggled with? If so, how did you overcome them?
3. If you were to perform this technique in person, which part/s would you need to practice the most? Explain.
4. How are the results of this experimental technique analyzed? Are there any limitations?
5. Do you think this technique would be used in a field of science that you're interested in? Explain.
