

## Fall 2025 10U/12U Core Season Game Day Team/Spectator Seating Arrangement

**Teams** shall be located on the same side of the field, on either side of the halfway line. Coaches shall remain within their technical areas (a 10 yard box on their team's side of the halfway line).

**Spectators** are encouraged to be on the side of the field which is opposite from the teams, at least 8 feet away from the touchline. Especially in warmer weather, spectators are allowed to seek shady spots outside of the spectator area, provided that they are behaving properly, showing good sportsmanship, and not coaching from the sidelines. If spectators are sitting behind the goal lines, they must be at least 20 feet away from the goals and may not distract the goal keepers.

**Remember:**

Coaches coach.

Players play.

And spectators cheer.

We always need coaches. Spectators can volunteer as coaches if they want to coach from the sidelines.

**All decisions regarding the spectators' seating location (based on the considerations above) are at the discretion of the Referee.**
