

A title should be the fewest possible words that accurately describe the content of the paper (Cambria, left, bold, 14pt)

First Author ^{a,1,*} , **Second Author** ^{b,2}, **Third Author** ^{c,3} (10 pt)

^aFirst affiliation, Country (9 pt);

^bSecond affiliation, Country (9 pt);

^cThird affiliation, Country (9 pt).

¹ Email first author; ² Email second author; ³ Email third author

*Correspondent Author

KEYWORD	ABSTRACT
	A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and thus to decide whether to read the document in its entirety. The Abstract should be informative and completely self-explanatory, provide a clear statement of the problem, the proposed approach or solution, and point out major findings and conclusions. The Abstract should be 100 to 250 words in length. The abstract should be written in the past tense. Standard nomenclature should be used, and abbreviations should be avoided. No literature should be cited. The keyword list provides the opportunity to add keywords, used by the indexing and abstracting services, in addition to those already present in the title. Judicious use of keywords may increase the ease with which interested parties can locate our article (10 pt). No references allowed in this section. This is an open-access article under the CC-BY-SA license. 

Introduction

[11 pt Cambria, Regular] Papers should original research contributions. Papers must be submitted electronically via open journal systems and Register In website <http://journal1.uad.ac.id/index.php/BAHAstra/index>. The introduction should contain research questions, literature review, and research method. Example Of Introduction, Indonesia is a big country which has a tremendous population. At least 250 millions people live in this whole archipelago area. It has a legend title which is very popular. As was sung by Koes Plus, "people said that our land is a paradise land, wooden stick and stone becomes plants." There are others similar compliment, one of them is 'the emerald equator', and so on.

It shows how wealth this country is. However, in vise versa, all of us know well about the real condition of the society's welfare in Indonesia. There are so many jobless people and job vacancy that can not pervade all of workers. It is very awful (Giannakas et al., 2019).

There are many assumptions that Indonesian society mentality is agrarian, worker, and only can be labour not a leader or activator. That assumption can be right. The fact is that work community level is dominated by the young generation who look for job vacancy, while the job opportunity which provided by the government is not match with the flow of school and university graduates.

Method

Before you begin to format your paper, first write and save the content as a separate text file. Keep your text and graphic files separate until after the text has been formatted and styled. Do not use hard tabs, and limit use of hard returns to only one return at the end of a paragraph. Do not add any kind of pagination anywhere in the paper. Do not number text heads-the template will do that for you. Finally, complete content and organizational editing before formatting. Please take note of the following items when proofreading spelling and grammar:

Results and Discussion

Heading 1

This section explains the results of the analysis. These should be presented clearly and concisely. Author(s) should explore the novelty or the contribution of their findings by comparing them to the existing literature and theories to Islamic education.

Fig 1. Figure title should place here

Supporting instruments such as tables use only horizontal lines, for example.

Table 1. Title must be placed on top of table

<i>Title 1</i>	<i>Title 2</i>	<i>Title 3</i>
entry 1	Data	data
entry 2	Data	data

Authors should discuss the results and how they can be interpreted from previous research and working hypotheses. Its findings and implications should be discussed in the widest possible context (Vink et al., 2019). The direction of future research can also be highlighted.

Conclusion

This section concludes and provides practical, theoretical, and policy implications, if any, of the study. The conclusion(s) should be drawn from the discussed items in the previous section of the manuscript (discussion).

Declarations

Author contribution	:	Yosi Wulandari was responsible for the entire research project. He also led the writing of the manuscript and the collaboration with the second author. M Ardi Kurniawan participated in the data collection, transcription and analysis. She also revised the manuscript. Both authors approved the final manuscript. EXAMPLE
Funding statement	:	This research did not receive any funding. (This research is funded by the government of ... with the contract no. ...)
Conflict of interest	:	Both authors declare that they have no competing interests.
Ethics Approval	:	Information on Ethics Approval and informed consent statements are required for all articles published in BAHASTRA since 2023.
Additional information	:	No additional information is available for this paper.

References

At least 40 reference, 80% journal reference from reputable scientific journals (minimum 5 references from international journals indexed by Scopus (ScienceDirect)) and 20% book reference. Bibliography organized using the system **APA 7th - American Psychological Association 7th Edition style**. An example of writing a references:
