

**School District of Waukesha
Annual Asbestos Notification
October 2021**

As a result of the federal law AHERA (Asbestos Hazard Emergency Response Act) all primary and secondary schools are required to develop and implement a plan for managing all building materials which contain asbestos. Included in the AHERA Act is the requirement to notify all parents, guardians and staff members, as well as organizations representing them, of activities and events with the asbestos containing building materials annually as well as make them aware of the availability of the districts asbestos management plan.

Asbestos has been used in many building materials due to its outstanding insulating and strengthening properties. When it is undisturbed or intact, it poses little hazard to human health. It is only when damage has or may occur that the quality of the school's management program becomes an issue.

In 1988, all buildings owned, leased, or "under the control of" the School District of Waukesha were inspected by EPA accredited inspectors, with building material samples analyzed by an independent laboratory. Based on the inspection, the School District of Waukesha prepared and the state approved a comprehensive management plan for administering the asbestos located within its buildings, safely and responsibly.

Once every three years, certified inspectors must re-inspect remaining materials. In addition, the rule requires a periodic walk-through (called "surveillance") in each area containing asbestos every six months.

Short-term workers (outside contractors e.g. telephone repair workers, electricians, etc.) must be provided information regarding the location of asbestos in which they may come into contact. All short-term workers shall contact the lead maintenance person before commencing work.

The School District of Waukesha has a list of the location(s) and type(s) of asbestos containing materials found in the building and a description and timetable for their proper management. A copy of the Asbestos Management Plan is available for review in the school office. Copies are available at twenty-five (25) cents per page. Our goal is to be in full compliance with AHERA. It is our policy to maintain a safe and healthful environment for our students and our staff members. This shall be accomplished by strict enforcement of the policies regarding asbestos by the asbestos manager and the school officials.

The School District of Waukesha also requires that all new building materials introduced into the School District of Waukesha are free from asbestos. For all new buildings/additions, the architect responsible for the design certifies that to the best of their knowledge, no asbestos containing materials are used. If new buildings are acquired, they too will be inspected.

Within the last year, the School District of Waukesha has completed a 6-Month Asbestos Surveillance of remaining materials. Asbestos removal has been conducted in cooperation with the on-going construction activities at:

Hawthorne Elementary School
Hillcrest Elementary School
Lowell Elementary School
Whittier Elementary School
Butler Middle School
Horning Middle School
Les Paul Middle School
South High School
