

We are seeking a **Palantir Engineer** with hands-on experience in Palantir Foundry or Gotham to support mission-driven data solutions. The ideal candidate will have strong Python and SQL skills, experience building data pipelines and integrations, and the ability to work on-site as needed in Crystal City and the Pentagon.

Responsibilities

- Build and maintain data pipelines and ETL/ELT workflows.
- Develop and support solutions in Palantir Foundry or Gotham.
- Work with Ontology, Workshop, Code Repos, and related Palantir tools.
- Write production-ready Python and SQL code.
- Support data integration, transformation, and quality efforts.
- Collaborate with technical and mission stakeholders.

Required Skills

- 3+ years of hands-on Palantir experience.
- Strong Python, SQL, and PySpark experience.
- Experience with data modeling and workflow automation.
- Familiarity with AWS, Azure, APIs, or Databricks.
- Federal or DoD environment experience preferred.
- Active clearance such as Secret, Public Trust, or higher preferred.

Location

- On-site as needed in the Crystal City and Pentagon area.
