

This is an unofficial quick-start guide with a curated list of Addons that have been tested and verified to work with the 1.12.1 client out of the box.

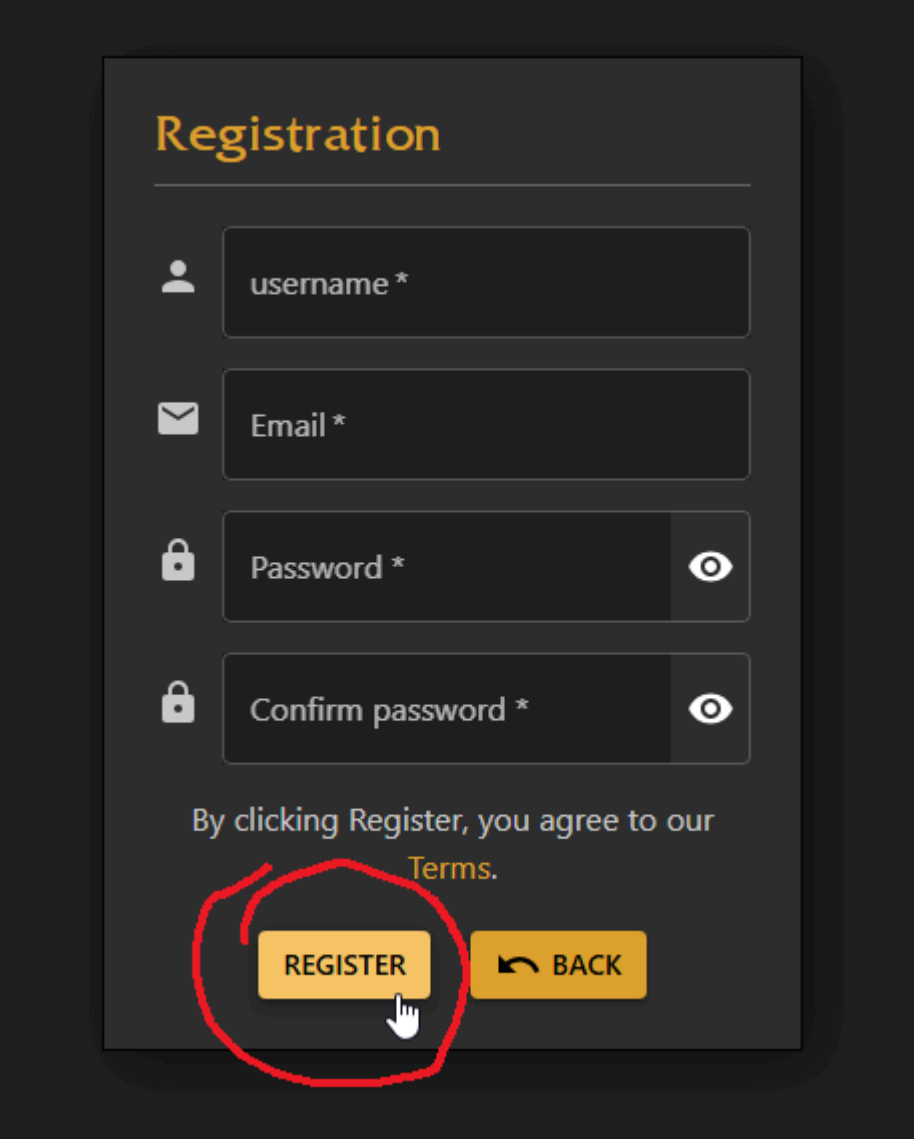

### Read the Server Rules:

<https://www.kronos-wow.com/project-kronos-rules/>

### 1.12.1 Client Download

[http://cdn.twinstar-wow.com/WoW\\_Vanilla.zip](http://cdn.twinstar-wow.com/WoW_Vanilla.zip)

## Create your account

A screenshot of a registration form on a dark background. The form is titled "Registration" in orange text. It contains four input fields: "username \*", "Email \*", "Password \*", and "Confirm password \*". Each field has a corresponding icon (person, envelope, padlock) and a visibility toggle (eye icon). Below the fields, there is a line of text: "By clicking Register, you agree to our Terms." The "REGISTER" button is highlighted with a red circle and a mouse cursor is pointing at it. A "BACK" button is also visible to the right of the "REGISTER" button.

**Registration**

# Run Latency Test

<https://twintest.tutis.me/>

**Twinstar Latency Test**

Start Latency Test

REALMLIST	login.twinstar-wow.com	154 ms
REALMLIST	login2.twinstar-wow.com	183 ms

All addons listed here have been tested with the **1.12.1** client on Kronos 4  
All addons are optional and may be used together(Except Aux and Auctioneer) or singly.  
No addon is required outside of the raid addons your Guild wants you to use.

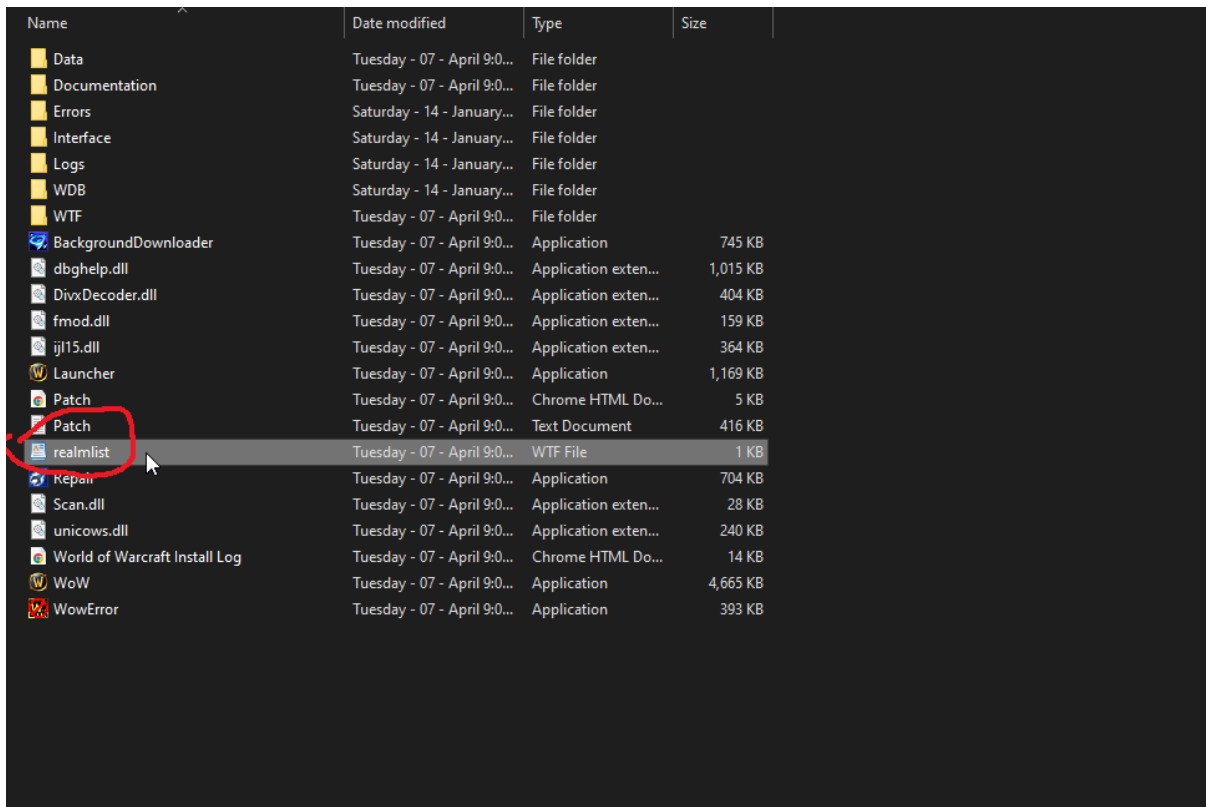

|

**Please don't harass me if you can't figure out how to unzip a file.**

Read the install directions (if applicable) and install as directed  
Some may require you to rename the folder.  
le:aux-addon-vanilla-master → aux-addon

## Edit Realmlist:

Open realmlist.wtf with a text editor(Notepad is fine)

Based on your results of the latency test replace this:

```
set realmlist us.logon.worldofwarcraft.com
```

With:

```
#set realmlist login.twinstar-wow.com  
#set realmlist login2.twinstar-wow.com  
set realmlist login3.twinstar-wow.com
```

Or:

```
#set realmlist login.twinstar-wow.com  
set realmlist login2.twinstar-wow.com  
#set realmlist login3.twinstar-wow.com
```

The # hides that line from the application.

If your ping is lower at [login.twinstar-wow.com](http://login.twinstar-wow.com) hide [login2.twinstar-wow.com](http://login2.twinstar-wow.com) with the #

If your ping is lower at [login2.twinstar-wow.com](http://login2.twinstar-wow.com) hide [login.twinstar-wow.com](http://login.twinstar-wow.com) with the #

In my screenshot above, my ping to login2.twinstar-wow is 183ms and is nearly 30ms higher than my login.twinstar-wow so I hid login2.twinstar-wow.

You may be required to adjust the amount of memory set aside for addons  
That's the Script Memory box on the top right of the addon screen.

Default is 48 MB, the more you increase it the longer it takes for your client to finish loading when you log in. Setting it to 0 allows your system to dynamically increase the amount of needed RAM on the fly, which is recommended if you've got more than 8GB of RAM.

Key:

Works 👍

Doesn't work 👎

Loads but requires further testing 🙌

## Client Fixes

**Vanilla Tweaks** 👍 — Some QoL stuff, fully compatible with Kronos.

Read the instructions

<https://github.com/brnodd/vanilla-tweaks>

**Vanilla Fixes** 👍 — Some performance stuff, fully compatible with Kronos

<https://github.com/hannesmann/vanillafixes>

## General

**WoW AI Voice Over Addon & Voiceover Sound File** 👍 — Adds AI generated voices based on the Voice Actors to all quest givers and most NPCs(ie: Guards and Flight masters), reads the quests to you.

<https://github.com/mrthinger/wow-voiceover/releases>

## Dungeons and Loot

**Atlas Loot/Atlas Loot Enhanced** 👍 - Dungeon viewer/Loot Tracker for Dungeons

<https://github.com/laytya/Atlas>

## Auction stuff

**Aux** — Fugly UI but it is functional 👍 -General Auction House utility

<https://github.com/shirsig/aux-addon-vanilla>

**Auctioneer(GitHub link)** 🙄 — Link provided in case you want to fuck around with it and get it to work, but I cba.

<https://github.com/Logonz/Auctioneer-3-9-0-1260-beta-1.12.1>

**Auctioneer(Legacy WoW link)** 👍 — more obtuse than Aux, works, General Auction House utility

<https://legacy-wow.com/vanilla-addons/auctioneer/>

## UI

**Chat Scroll** 👍 — Lets you scroll the chat with your Mousewheel

<https://legacy-wow.com/vanilla-addons/chatscroll/>

**Equip Compare** 👍 - Mouseover Item comparisons

<https://github.com/ellingtonsantos/EquipCompare>

**Mob Health** 👍 — Shows Mob health, have to hit the mob first, and it resets per mob.

<https://github.com/ellingtonsantos/MobHealth>

**Move Anything!** 👍 type /move lets you move most/all of the UI elements around.

<https://legacy-wow.com/vanilla-addons/moveanything/>

**Shagu Tweaks** 👍 — A bunch of QoL stuff(Read the GitHub) and more menu options.

<https://github.com/shagu/ShaguTweaks>

**Titan Panel + Addons(ie: TitanXP, TitanGold, Etc)** - UI addon that adds a bar to the top and/or bottom of the screen.

**Titan Panel (Legacy WoW Link)** 👍

<https://legacy-wow.com/vanilla-addons/titan-panel/>

**Titan Panel(Github Link)** 🙄 — Link provided in case you want to fuck around with it and get it to work, but I cba.

<https://github.com/JackTrapper/titan-panel>

## Utility

**Group Finder** 🖐️ — Group Finder UI - Loads and you can click buttons on the UI but idk if it

works because nobody else is currently using it

<https://github.com/redshadowz/Groupfinder>

**Census Plus** 👍 — Takes a Census of everybody currently online, takes 5ever to scan, go make a tea or take a dump while doing your scan. There's also nowhere to upload to, this is purely for your personal information/screenshots for discord

<https://github.com/laytya/CensusPlus>

## Quest related

**Questie** — Quest addon with a ton of features, may cause FPS drops and FPS spikes if you've got a bunch of icons going at once. If you've got a potato, PFQuest is the better choice. Has Quest Completion Reporting built-in.

**Questie(Github Link)** 👍 — Works, takes some configuring via text commands with /questie

<https://github.com/Questie/Questie/releases/tag/v3.69>

**Questie(Legacy WoW Link)** 🙌 — Links to GitHub, use the GitHub version but if it doesn't work try this.

<https://legacy-wow.com/vanilla-addons/questie/>

**PFQuest** 👍 — Quest Addon, Questie Alternative and better overall than Questie depending on what your needs are. Use one or the other. PFQuest requires more memory(RAM) than Questie does initially and is much easier to use than Questie. Does not have Quest Completion reporting built-in.

<https://github.com/shagu/pfQuest>

## Professions

**Gatherer** — Tracks the location of Herbs, Ores, and Treasure chests on the world and minimap.

GitHub 👍 — Use this over the Legacy WoW version.

<https://github.com/jsb/Gatherer>

Legacy WoW 👍 — Use this if the GitHub version doesn't work

<https://legacy-wow.com/vanilla-addons/gatherer/>

## More Addons can be found on these sites:

The vast majority likely work out of the box but I haven't tested them.
