Answers

When chimpanzees want to get some (1)rest, they usually climb up a tree. But they don't choose just any tree. In fact, (2)researcher David Sampson recently discovered that chimpanzees (3)select special trees for their beds. Over seventy percent of chimpanzees studied sleep in the Ugandan Ironwood tree. Chimpanzees know that this type of tree has the strongest wood and the best material for (4)comfortable beds. Scientists like Sampson have a (5)theory that sleeping comfortably is connected with intelligence. They believe that millions of years ago, some of the great apes moved from sleeping in the branches of trees to making their own beds. This meant that they slept better, and over time, became more intelligent. So what does this mean for you? You know sleep makes your (6)brain work better. If you want to pass that hard test, make sure that you have the most comfortable bed in the house!
