

Go math 5th grade homework book answer key

Example 1 Use the table to find the relationship between miles and feet.

The distance between the new high school and the football field is $4\frac{1}{2}$ miles. How does this distance compare to 10,000 feet?

When you convert larger units to smaller units, you need to multiply.

STEP 1 Convert 2 miles to feet.

Think: 1 mile is equal to 5,280 feet.

I need to Multiply the total number of miles by 5,280.

total miles	feet in 1 mile	total feet
2	$\times 5,280$	$10,560$
2 miles = <u>10,560</u> feet		

STEP 2 Compare. Write $<$, $>$, or $=$.

10,560 feet $>$ 10,000 feet

Since 10,560 is greater than 10,000, the distance between the new high school and the football field is longer than 10,000 feet.

Example 2 Convert to mixed measures.

Mixed measures use more than one unit of measurement. You can convert a single unit of measurement to mixed measures.

1 foot (ft)	= 12 inches (in.)
1 yard (yd)	= 3 ft.
1 mile (mi)	= 5,280 ft.
1 mile	= 1,760 yd
