

Here are some online links to help provide enrichment and structure for your 5th grader during our time out of school. These are not designed to replace the direct instruction that will be missed, but rather an opportunity to allow your child to learn about some topics of interest related to math and science. At this time, we do not expect any completed work to be returned to school, but we are always happy to look over anything that you want to send us via email or google classroom if you have questions. We would LOVE to hear about the fun things that you are learning and hope to find a way to share some of those experiences online for all of us to enjoy.

✓ The San Diego Zoo has a website just for kids with amazing videos, activities, and games. Enjoy the tour!
