

How to list iid for vm on a node

Jing, mqjing@gmail.com

Command

```
nova list --all-tenant --host computenode13 | grep shared | awk '{print$2/" "$4}' | cut -d'/' -f1
```

Script

```
host=computenode13
for a in $(nova list --all-tenant --host ${host} | grep share | awk '{print$2/" "$4}'); do
    # echo a=${a}
    name=$(echo $a | cut -d'/' -f2)
    iid=$(echo $a | cut -d'/' -f1)

    echo "name=${name} and iid=${iid}"
done
```
