ABSTRACT

This template is a new author guideline and article template of JMIL (Jurnal Manajemen Industri dan Logistik / *Journal of Industrial and Logistics Management*) start in year 2022 publication since JMIL reach national accreditation 2nd rank. An abstract is presented separate from the article, so it must be able to stand alone. A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and thus to decide whether to read the document in its entirety. The abstract should be typed as concise as possible and should be composed of: **problem statement, method, scientific finding results, value, implication**. The abstract should only be typed in one paragraph and one-column format. **The Abstract should be 100 to 200 words in length**. References should be avoided, but if essential, then cite the author(s) and year(s).

This is an open access article under the [CC-BY](#) license.

INTRODUCTION (12 pt, bold)

The introduction includes the background, theoretical basis, problems, problem solving plans and research objectives. The introduction is written using Calibri letters, size 12 and space 1 cm. The contents of the article are typed in two-column format (column width = 2.98 inch and column spacing = 0.5 inch) on one face of A4 size HVS white paper. The manuscript is arranged in 5 main subtitles (written in capital letters) and 3 supplementary subtitles (written in sentence letters), **with a minimum of pages 8 to 20 pages.**

The Introduction section should provide: i) a clear background, ii) a clear statement of the problem, iii) the relevant literature on the subject, iv) the proposed approach or solution, and v) the new value of research which it is innovation (within 3-6 paragraphs). It should be understandable to colleagues from a broad range of scientific disciplines. Organization and citation of the bibliography are made in Institute of Electrical and Electronics Engineers (IEEE) style in sign [1], [2] and so on. The terms in foreign languages are written italic (*italic*). The text should be divided into sections, each with a separate heading and numbered consecutively [3] **and make it hyperlink to the references.** The section or subsection headings should be typed on a separate line, e.g., 1. INTRODUCTION. A full article usually follows a standard structure: **1. Introduction, 2. The Comprehensive Theoretical Basis and/or the Proposed Method/Algorithm (optional), 3. Research Method, 4. Results and Discussion, and 5. Conclusion.** The structure is well-known as **IMRaD** style.

Literature review that has been done author used in the section "INTRODUCTION" to explain the difference of the manuscript with

other papers, that it is innovative, it are used in the section "METHOD" to describe the step of research and used in the section "RESULTS AND DISCUSSION" to support the analysis of the results [4]. If the manuscript was written really have high originality, which proposed a new method or algorithm, the additional section after the "INTRODUCTION" section and before the "METHOD" section can be added to explain briefly the theory and/or the proposed method/algorithm [5].

RESEARCH METHOD (12 pt, bold)

This section explains the rationale for the application of specific approaches, methods, procedures or techniques used to identify, select, and analyze information applied to understand the research problem/project, thereby, allowing the readers to critically evaluate your project's/study's overall validity and reliability.

The research method used must be written in a scientific manner, and valid, namely rational, empirical and systematic. It should be clearly stated the time and place of the study, along with the data and tools and materials used in the study. The research method Explaining research chronological, including research design, research procedure (in the form of algorithms, Pseudocode or other), how to test and data acquisition [6]–[7]. The description of the course of research should be supported references, so the explanation can be accepted scientifically [8], [9]. [Figures 1](#) and [Table 1](#) are presented center, as shown below and cited in the manuscript [10], [11–13]. The settlement curves produced has been illustrated in [Figure 2\(a\)](#) and [Figure 2\(b\)](#).

Figure 1. Schematic diagram of the physicochemical treatment process in the station of the textile industrial unit.

RESULT AND DISCUSSION (12 pt, bold)

The results and discussion contain the results of the analysis of phenomena in the research area that are relevant to the theme of the study. Research results should be compared with relevant research theories and findings. Write down the findings obtained from the results of research that has been done and must be supported by adequate data. Research results and findings must be able to answer the research questions or hypotheses in the introduction

Sub section 1

Equations should be placed at the center of the line and provided consecutively with equation numbers in parentheses flushed to the right margin, as in (1). The use of Microsoft Equation Editor or MathType is preferred.

$$E_v - E = \frac{h}{2.m} (k_x^2 + k_y^2) \quad (1)$$

All symbols that have been used in the equations should be defined in the following text.

Sub section 2

Proper citation of other works should be made to avoid plagiarism. When referring to a reference item, please use the reference number as in [14] or [15] for multiple references. The use of "Ref

[14]..." should be employed for any reference citation at the beginning of sentence. For any reference with more than 3 or more authors, only the first author is to be written followed by *et al.* (e.g. in [16]). Examples of reference items of different categories shown in the References section. Each item in the references section should be typed using 9 pt font size.

CONCLUSION (12 pt, bold)

The conclusion is intended to answer the research problems or purposes. It helps the readers understand why your research should matter to them after they have finished reading the paper. It is not just a summary of the main topics covered or a re-statement of your research problem, but a synthesis of key points and, if applicable, where you recommend new areas for future research.

REFERENCES (12 pt, bold)

Bibliography only contains references that

are **directly the source of citations** and typed in one-column format. Use of references must be primary 60% must be sourced from the journal, and primary journal references 60% should not be more than 10 years since the writing was

made. Writing Bibliography should use reference management applications such as Mendeley, End Note, Zotero, or others. The writing style follows the IEEE style for ways of referring and presenting references in the reference list.

BIOGRAPHIES OF AUTHORS (12 PT. , one coloumn)

The recommended number of authors is at least 2. One of them as a corresponding author.

Please attach clear photo and Author Contribution. Example of biographies of authors:

Author 1	Contribution :
	Abdel-Rahman Hedar    holds a Doctor of Informatics degree from Kyoto University, Japan in 2004. He also received his B.Sc. and M.Sc. (Mathematics) from Assiut University, Egypt in 1993 and 1997, respectively. He is currently an associate professor at Computer Science Department in Jamoum, Umm Al-Qura University, Makkah, Saudi Arabia. He is also an associate professor of artificial intelligence in Assiut University since January 2012. His research includes meta-heuristics, global optimization, machine learning, data mining, bioinformatics, graph theory and parallel programming. He has published over 70 papers in international journals and conferences. From July 2005 to July 2007, he was a JSPS research fellow in Kyoto University, Japan. He can be contacted at email: ahahmed@uqu.edu.sa or hedar@aun.edu.eg. The Author Contribution are (Choose&Erase) : Conceptualization, Methodology, Software, Validation, Formal Analysis, Investigation Resources,DataCuration,Writing – Original Draft, Writing – Review & Editing, Visualization,Supervision,Project Administration, Funding Acquisition
Author 2	
	Patricia Melin    received the D.Sc. degree (Doctor Habilitatus D.Sc.) in computer science from the Polish Academy of Sciences, Warsaw, Poland, with the Dissertation “Hybrid Intelligent Systems for Pattern Recognition using Soft Computing”. She is a Professor of Computer Science in the Graduate Division, Tijuana Institute of Technology, Tijuana, Mexico since 1998. In addition, she is serving as Director of Graduate Studies in computer science and Head of the research group on Computational Intelligence (2000–present). Her research interests are in Type-2 Fuzzy Logic, Modular Neural Networks, Pattern Recognition, Neuro-Fuzzy and Genetic-Fuzzy hybrid approaches., She is currently the President of Hispanic American Fuzzy Systems Association (HAFSA) and is the founding Chair of the Mexican Chapter of the IEEE Computational Intelligence Society. She can be contacted at email: pmelin@tectijuana.mx. The Author Contribution are (Choose&Erase) : Conceptualization, Methodology, Software, Validation, Formal Analysis, Investigation Resources,DataCuration,Writing – Original Draft, Writing – Review & Editing, Visualization,Supervision,Project Administration, Funding Acquisition
Author 3	
	Dr. Kennedy Okokpujie    holds a Bachelor of Engineering (B.Eng.) in Electrical and Electronics Engineering, Master of Science (M.Sc.) in Electrical and Electronics Engineering, Master of Engineering (M.Eng.) in Electronics and Telecommunication Engineering and Master of Business Administration (MBA), Ph.D in Information and Communication Engineering, besides several professional certificates and skills. He is currently lecturing with the department of Electrical and Information Engineering at Covenant University, Ota, Ogun State, Nigeria. He is a member of the Nigeria Society of Engineers and the Institute of Electrical and Electronics Engineers (IEEE). His research areas of interest include Biometrics, Artificial Intelligent, and Digital signal Processing. He can be contacted at email: kennedy.okokpujie@covenantuniversity.edu.ng.

	The Author Contribution are (Choose&Erase) : Conceptualization, Methodology, Software, Validation, Formal Analysis, Investigation Resources, Data Curation, Writing – Original Draft, Writing – Review & Editing, Visualization, Supervision, Project Administration, Funding Acquisition
