the commission process

step 1.

the client sends their specific requests: commission type (see above), and preferably a reference

step 2.

i send a sketch to the client, and if they are happy with it i send a link to my paypal and the payment is made. if not, i adjust the draft as necessary until it is satisfactory.

step 3.

during the drawing process, i will send progress shots if asked. if necessary, i may ask for clarifications about different parts of the drawing. this may take up to a few weeks depending on how much time i have.

step 4.

when i am finished with the drawing, i send the (hopefully final) piece to the client. if the client is satisfied, the transaction is done. if not, i will allow for a few minor adjustments to be made.

any more questions? send me a dm [here](#) and i'll get back to you ASAP!
