

# Privacy Policy for AM Player

Effective Date: April 20, 2026

**Effective Date: April 20, 2026**

**App Name:** AM Player

**Developer:** Sung S. Jun

**Contact Email:** sunsikjun@gmail.com

This Privacy Policy applies to the **AM Player** app (hereinafter referred to as “the App”). The App is a completely offline media player that searches, plays, and manages audio, video, and image files stored locally on your device.

## 1. Information We Collect

**AM Player does not collect any personal information from users.**

- We do not collect any personally identifiable information (PII) such as name, email address, phone number, location, or user account details.
- We do not collect usage data, analytics, crash reports, or any device identifiers for external transmission.
- The only information the App accesses is the **media files (audio, video, and images)** that are already stored on your device’s internal storage. No personal data is collected or stored.

## 2. Device Storage Access

To provide its core functionality, the App requires access to your device storage with the following permissions:

- **Storage / Media Permissions** (READ\_MEDIA\_AUDIO, READ\_MEDIA\_VIDEO, READ\_MEDIA\_IMAGES, or equivalent): To scan and list audio (music), video, and image files stored on your device and create playlists or galleries.
- **Write / Edit Permissions:** To allow users to copy selected files to another folder, rename files, or delete files.
- **Notification Permission:** To display the currently playing music title in the notification area and provide playback controls (play, pause, previous, next, and open player screen) while music is playing in the background.
- **Phone State Access:** The App uses Android’s system features to detect if a call is in progress and automatically pauses music or video playback during calls. **The App does not monitor incoming call states and does not use the READ\_PHONE\_STATE permission.**

All access happens **locally on your device** and no data is sent to any external servers.

### 3. How We Use the Information

The media file information accessed by the App is used solely for the following purposes:

- Scanning audio files to create music playlists and play selected songs.
- Scanning video files to create a playable list and play selected videos.
- Scanning image files to create a gallery list and display selected images on screen.
- Displaying current playback information and controls in the notification area during music playback.
- Automatically pausing playback when a call is detected.

All processing is performed **entirely offline** on your device. No data is transmitted or stored externally.

### 4. Third-Party Services

**AM Player does not use any third-party services.**

- We do not integrate Firebase, Google Analytics, advertising SDKs, crash reporting tools, or any cloud services.
- The App has no network connectivity and does not make any internet calls or communicate with external servers.

### 5. Data Storage and Security

- All media files remain stored on **your device's internal storage**. The App does not make additional copies unless you explicitly use the copy function.
- Since no personal information is collected, there is no user data to store or secure on external servers.
- The App only uses the minimum permissions necessary for its functionality.

### 6. Data Retention and Deletion

- Because AM Player does not collect or store any personal information, data retention policies do not apply to user data.
- Any temporary caches or playlists created by the App are stored locally on your device and are removed when the App is uninstalled or cleared.
- Media files on your device can be managed or deleted directly by you through the App or your device's file manager.

### 7. Your Choices and Rights

- You can grant or revoke any permissions at any time through your device Settings → Apps → AM Player → Permissions.
- Uninstalling the App will remove all App-related data and permissions from your device.
- If you do not wish to allow access to your media files, simply do not grant the storage permissions or uninstall the App.

## **8. Children's Privacy**

This App is not directed at any specific age group and **can be used by users of all ages**. Children are welcome to enjoy fairy tale songs, educational videos, pictures, and other media content freely.

Since the App does not collect any personal information, it does not collect or process any data from children.

## **9. Changes to This Privacy Policy**

We may update this Privacy Policy from time to time. If changes are made, we will update the "Effective Date" at the top of this page. Significant changes will be notified within the App.

## **10. Contact Us**

If you have any questions or concerns regarding this Privacy Policy or the App's data practices, please contact us at:
