

WonTon Face Tracking Settings Install Guide(EN)

This tutorial is only for 九尾の傍観者 #9b3d

1. Check your Avatar version

9B3D_v1.0_MMD_v1.0.unitypackage

Please use the latest avatar version.

eg: For “Soraha_v1.4_VRCFT_Settings_v1.0.unitypackage”

v1.4 for avatar version

v1.0 for FTSettings version

9B3D_v1.0_MMD_v1.0.unitypackage

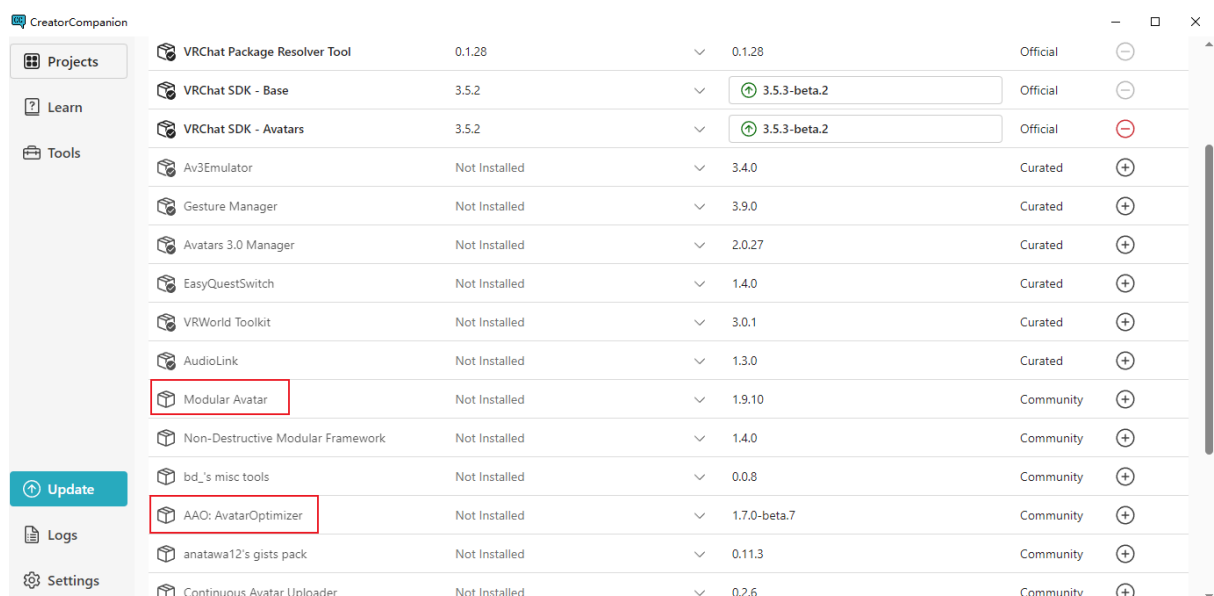

v1.0 for avatar version

v1.0 for MMD version

If you find that the latest version of avatar still cannot install FT, please contact me.

Discord:wonton7115

2. Import the plugins

VRChat Package Resolver Tool	0.1.28	0.1.28	Official	⊖
VRChat SDK - Base	3.5.2	3.5.3-beta.2	Official	⊖
VRChat SDK - Avatars	3.5.2	3.5.3-beta.2	Official	⊖
Av3Emulator	Not Installed	3.4.0	Curated	⊕
Gesture Manager	Not Installed	3.9.0	Curated	⊕
Avatars 3.0 Manager	Not Installed	2.0.27	Curated	⊕
EasyQuestSwitch	Not Installed	1.4.0	Curated	⊕
VRWorld Toolkit	Not Installed	3.0.1	Curated	⊕
AudioLink	Not Installed	1.3.0	Curated	⊕
Modular Avatar	Not Installed	1.9.10	Community	⊕
Non-Destructive Modular Framework	Not Installed	1.4.0	Community	⊕
bd_'s misc tools	Not Installed	0.0.8	Community	⊕
AAO: AvatarOptimizer	Not Installed	1.7.0-beta.7	Community	⊕
anatawa12's gists pack	Not Installed	0.11.3	Community	⊕
Continuous Avatar Uploader	Not Installed	0.2.6	Community	⊕

AvatarOptimizer(AAO)

You can find the aao unitypackage in my zip, or you can add it by VCC or find it in Github: [anatawa12/AvatarOptimizer: AAO: Avatar Optimizer: Non Destructive Avatar Optimization Utilities \(github.com\)](https://github.com/anatawa12/AvatarOptimizer)

Modular Avatar(MA)

Because 9b3d already has requirements for MA, so I just mentioned it.

[Modular Avatar | Modular Avatar \(nadena.dev\)](#)

Liltoon

Because 9b3d already has requirements for Liltoon, so I just mentioned it.

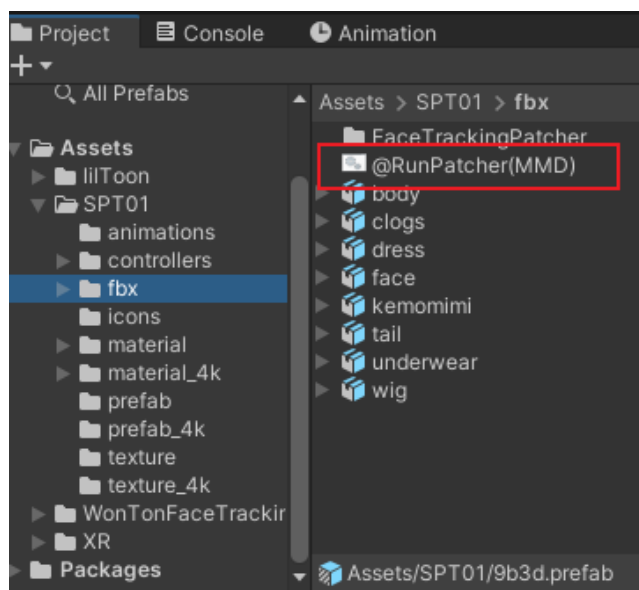

[【無料】lilToon - lilLab - BOOTH](#)

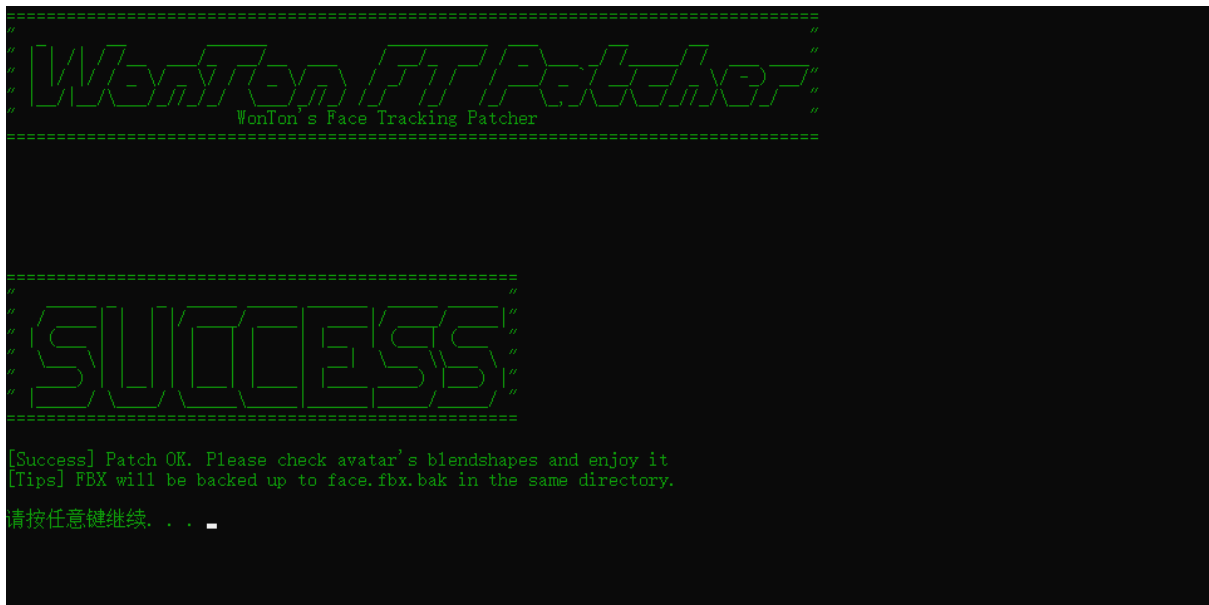

3. Import the Avatar and FT/MMD

About the FT Install, the subsequent processes are consistent with my general installation tutorial. Please refer to it.(the only difference is the previous plugins)

[WonTon Face Tracking Settings Install Guide\(EN\) - Google 文档](#)

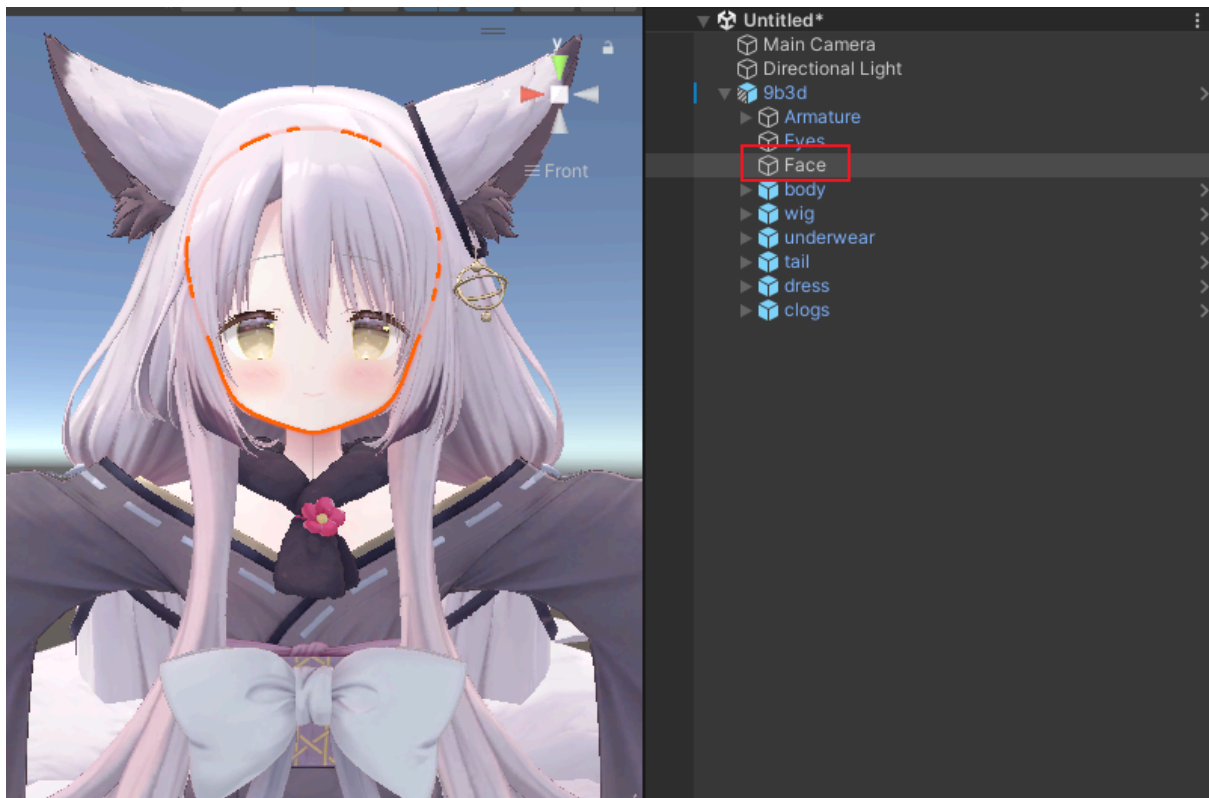

MMD User just need to find this path and open the Patcher(MMD)

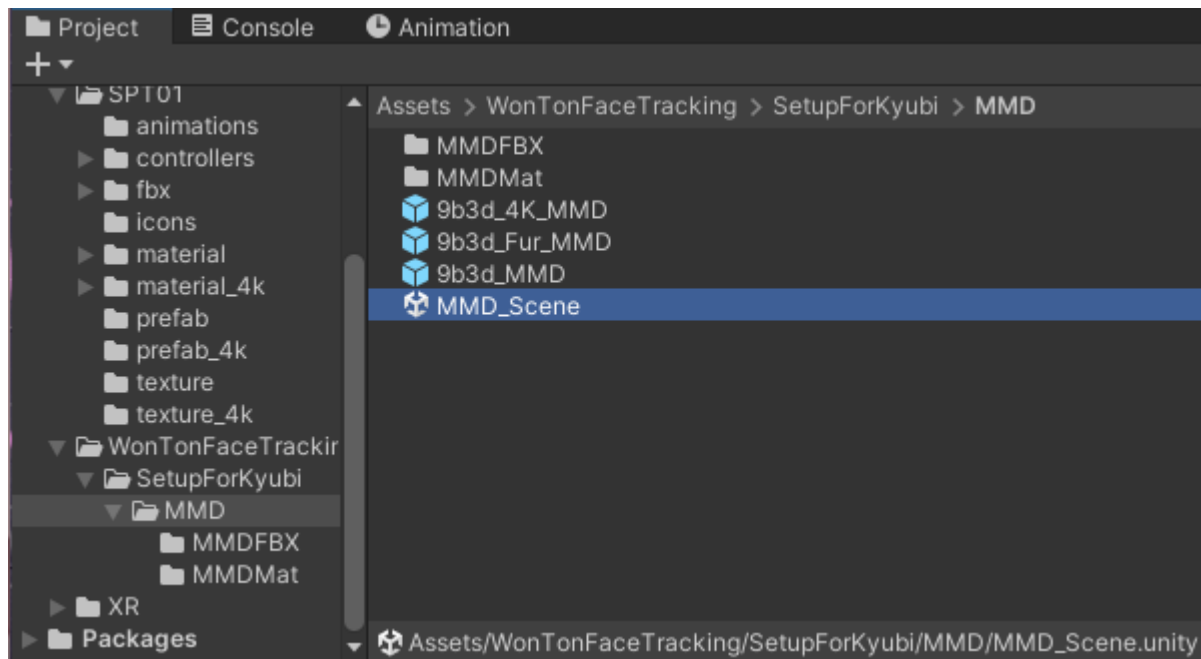

Success should like this.

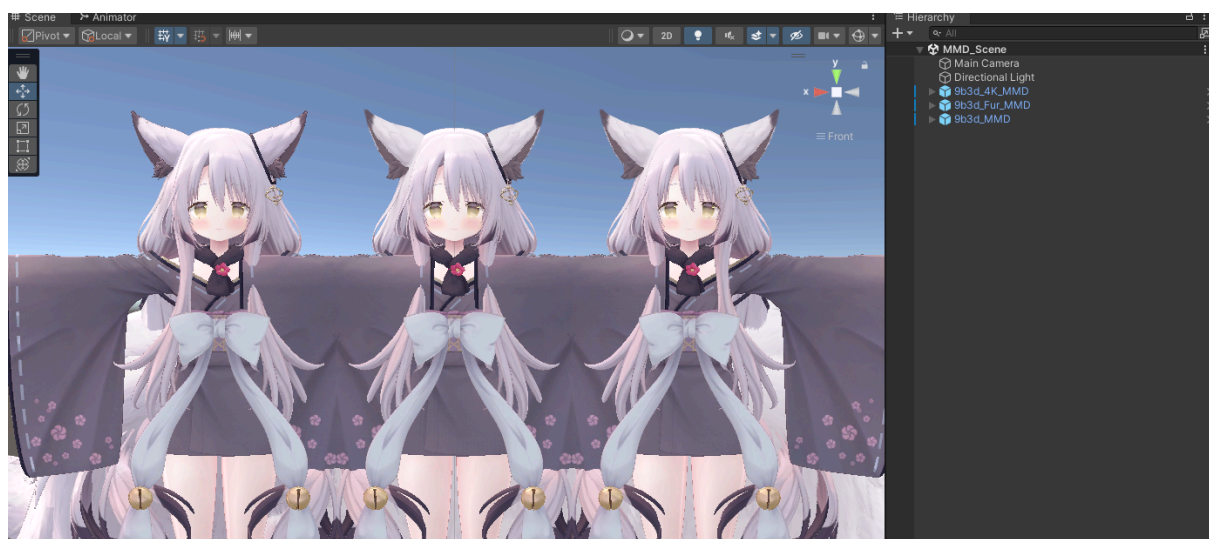

Because in the original prefab the face is not call "Body", so it can't work in MMD world.(Even the eye and face are separate.)

So I prepared prefabs and scene for you.

Open this path and use this Scene, it will have AAO script to merge Eye Face and MMD.

Now upload and enjoy~
